Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Principles of detection	1
5 Generation and detection of tracer gas flow	2
5.1 Tracer gas flows into the object (Group A techniques)	2
5.2 Tracer gas flows out of the object (Group B techniques)	2
6 Apparatus	2
7 Object preparation	2
8 Group A techniques, tracer gas flows into the object	3
8.1 General	3
8.2 Initial system set-up procedure	3
8.3 Vacuum technique (total) test procedure (A.1)	4
8.4 Vacuum technique (partial) test procedure (A.2)	5
8.5 Vacuum technique (local) test procedure (A.3)	5
9 Group B techniques, tracer gas flows out of object	6
9.1 General	6
9.2 Initial system set up procedure	7
9.2.1 Ammonia test with colour-change reagents (B.1)	7
9.2.2 Tracer gas flowing out of the object (B.2, B.3, B.4, B.6)	7
9.2.3 Pressurisation — Evacuation test (B.5)	8
9.3 Ammonia test procedure (B.1)	8
9.3.1 General	8
9.3.2 Test object preparation	8
9.3.3 Reagent application	8
9.3.4 Ammonia pressurization	8
9.3.5 Impregnation time	9
9.3.6 Visual examination	9
9.3.7 Post test cleaning	9
9.4 Vacuum box test procedure (B.2.1, B.2.2)	9
9.4.1 General	9
9.4.2 Vacuum box technique for closed objects B.2.1	9
9.4.3 Vacuum box technique for open objects B.2.2	10
9.5 Accumulation technique (B.3)	10
9.5.1 General	10
9.5.2 Accumulation technique procedure (B.3)	10
9.6 Sniffing test (B.4)	12
9.7 Bombing technique (B.5)	12
9.8 Vacuum chamber technique (B.6)	14
9.9 Carrier gas technique (B.7)	15
10 Test report	16
Annex A (informative) Accumulation technique: calibrated leak connected to enclosure of unknown volume	17
Bibliography	19

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 135, *Non-destructive testing*, Subcommittee SC 6, *Leak testing*.
