Foreword	v
Introduction	vi
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Abbreviated terms	2
5 Personal health decision support	3
5.1 General	3
5.2 Concept model	4
5.3 Data flows	4
5.3.1 General	4
5.3.2 Data flow between the PHDS service and data provider	5
5.3.3 Data flow between the PHDS service and PHDS client	6
5.4 Use cases	6
5.4.1 General	6
5.4.2 Deciding on a course of treatment	6
5.4.3 Managing a chronic disease	6
5.4.4 Understanding health risks	6
5.4.5 Adhering to a treatment plan	7
5.4.6 Choosing a healthcare provider	7
6 Interoperability requirements for personal health decision support	7
6.1 PHDS service	7
6.1.1 General	7
6.1.2 Support for health data exchange	7
6.1.3 Data acquisition via standardized APIs	7
6.1.4 Integration with PHDS clients	7
6.1.5 Validation of incoming health data	7
6.1.6 Automatic data synchronization	7
6.1.7 Semantic data mapping and transformation	7
6.1.8 Acknowledgement and error response generation	7
6.1.9 Robust error-handling mechanisms	8
6.1.10 Audit logging of data transactions	8
6.1.11 Transformation into decision-support-ready formats	8
6.1.12 Data visualization and reporting tools	8
6.2 Data provider	8
6.2.1 General	8
6.2.2 Use of standard data formats and terminologies	8
6.2.3 Secure transmission of health data	8
6.2.4 Support for updates and corrections	8
6.2.5 Metadata and provenance information	8
6.2.6 Real-time or near real-time data transmission	8
6.2.7 Consent-based data sharing	8
6.2.8 Multi-endpoint transmission support	9
6.2.9 Data compression	9
6.3 PHDS client	9
6.3.1 General	9
6.3.2 Result reception	9
6.3.3 Acknowledgement to PHDS service	9
6.3.4 Secure communication channel	9
6.3.5 User authentication and authorization	9
6.3.6 User-friendly result presentation	9
6.3.7 Customizable result display	9
6.4 Privacy and security considerations	9

6.4.1	General	9
6.4.2	Data encryption.....	10
6.4.3	Access control	10
6.4.4	Data retention.....	10
6.4.5	Incident response	10
6.4.6	Consent management.....	10
6.4.7	User-initiated data deletion.....	10
6.4.8	Security notifications.....	10

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents. ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 215, *Health informatics*, in collaboration with European Committee for Standardization (CEN) Technical Committee CEN/TC 251, *Health informatics*, in accordance with the Agreement on technical cooperation between ISO and CEN (Vienna Agreement).

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
