Foreword	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Principles of sampling slurries	2
4.1 General	2
4.2 Sampling errors	3
4.2.1 General	3
4.2.2 Preparation error	4
4.2.3 Delimitation and extraction errors	4
4.2.4 Weighting error, E_W	5
4.2.5 Periodic quality fluctuation error, E_{Q3}	6
4.3 Sampling and overall variance	6
4.3.1 Sampling variance	6
4.3.2 Overall variance	6
5 Sampling schemes	7
6 Minimization of bias and unbiased increment mass	13
6.1 Minimizing bias	13
6.2 Volume of increment for falling stream samplers to avoid bias	14
6.3 Volume of increment for manual sampling to avoid bias	14
7 Precision of sampling and determination of increment variance	15
7.1 Overall precision	15
7.2 Primary increment variance	15
7.3 Preparation and testing variance	16
8 Number of sub-lots and number of increments per sub-lot	16
9 Minimum mass of solids in lot and sub-lot samples	17
9.1 General	17
9.2 Minimum mass of solids in lot samples	17
9.3 Minimum mass of solids in sub-lot samples	17
9.4 Minimum mass of solids in lot and sub-lot samples after size reduction	17
10 Time-basis sampling	18
10.1 General	18
10.2 Sampling interval	18
10.3 Cutters	18
10.4 Taking of increments	18
10.5 Constitution of lot or sub-lot samples	19
10.6 Division of increments and sub-lot samples	19
10.7 Division of lot samples	19
10.8 Number of cuts for division	19
11 Stratified random sampling within fixed time intervals	19
12 Mechanical sampling from moving streams	20
12.1 General	20
12.2 Design of the sampling system	20
12.2.1 Safety of operators	20
12.2.2 Location of sample cutters	20
12.2.3 Provision for duplicate sampling	20
12.2.4 System for checking the precision and bias	20
12.2.5 Minimizing bias	21
12.3 Slurry sample cutters	22
12.3.1 General	22

12.3.2	Falling-stream cutters	22
12.3.3	Cutter velocities	22
12.4	Mass of solids in increments	22
12.5	Number of primary increments	23
12.6	Routine checking	23
13	Manual sampling from moving streams	23
13.1	General	23
13.2	Choosing the sampling location	23
13.3	Sampling implements	24
13.4	Mass of solids in increments	24
13.5	Number of primary increments	24
13.6	Sampling procedures	24
14	Sampling of stationary slurries	25
15	Sample preparation procedures	25
15.1	General	25
15.2	Reduction mills	25
15.3	Sample division	25
15.4	Chemical analysis samples	25
15.5	Physical test samples	25
16	Packing and marking of samples	26
Annex A (informative)	Examples of correct slurry devices	27
Annex B (informative)	Examples of incorrect slurry sampling devices	30
Annex C (normative)	Manual sampling implements	34

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 27, *Solid mineral fuels*, Subcommittee SC 4, *Sampling*.

This second edition cancels and replaces the first edition (ISO 20904:2006), of which it constitutes a minor revision. The changes compared to the previous edition are as follows:

- an amendment to [Figure 6 b](#)) to read — incorrect;
- correction to [Figure 7 b](#)).

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
