Foreword.....	v
1 Scope.....	1
2 Normative references.....	1
3 Terms, definitions and symbols.....	1
3.1 Terms and definitions.....	1
3.2 Symbols.....	3
4 Thrust restraint principles, calculation rules and general specification.....	4
4.1 Thrust forces.....	4
4.2 Calculation rules and general specification.....	4
4.3 Standard jointing systems offer no longitudinal restraint.....	5
4.4 Restrained joint systems.....	5
4.5 Length to be restrained.....	5
4.6 Restrained design method.....	5
4.7 Gravity thrust blocks.....	6
5 Thrust force.....	6
5.1 Internal hydrostatic pressure in straight pipes.....	6
5.2 Internal hydrostatic pressure in bends.....	6
5.3 Internal hydrostatic pressure in other configurations.....	7
6 Restrained joints.....	8
6.1 Principle.....	8
6.2 Conservative design.....	8
6.3 Required prevailing site conditions.....	8
7 Unit frictional force, F_s.....	8
7.1 Static frictional force.....	8
7.2 Values of soil cohesion.....	9
8 Polyethylene encasement and PU coating and other extruded organic coatings.....	10
9 Unit bearing resistances, R_s.....	10
9.1 Lateral resistance, passive soil pressure.....	10
9.2 Design value of passive soil pressure.....	10
9.3 Empirical values of passive soil pressure.....	11
10 Application to common situations.....	14
10.1 Horizontal bends.....	14
10.2 Vertical down bends.....	15
10.3 Vertical up bends.....	15
10.4 Tees.....	16
10.5 Reducers.....	17
10.6 Dead ends.....	17
10.7 Encroaching restrained lengths.....	17
10.8 Equal angle vertical offset (θ).....	18
10.9 Combined horizontal equal angle bends (θ).....	19
10.10 Combined horizontal unequal angle bends.....	20
10.11 Combined vertical equal angle offsets (θ).....	21
10.11.1 Pipeline under obstruction.....	21
10.11.2 Pipeline over obstruction.....	22
11 Restrained lengths.....	22
12 Installation and laying instruction.....	22
12.1 Select backfill considerations.....	22
12.1.1 Backfill material versus native soil support characteristics.....	22
12.1.2 Swamps or marshes.....	22
12.2 Combining thrust blocks/anchor blocks and restrained joints.....	22

12.3	Pipe in a casing.....	23
12.3.1	Restrained lengths inside casing.....	23
12.3.2	Balancing the thrust force with restraining lengths outside the casing.....	23
12.4	Future excavations	23
Annex A	(informative) Dimensions and unit weights of pipes filled with water for preferred class.....	24
Annex B	(informative) Soil classification chart.....	25
Bibliography	26

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 5, *Ferrous metal pipes and metallic fittings*, Subcommittee SC 2, *Cast iron pipes, fittings and their joints*.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
