**Corrosion of metals and alloys —  
Determination of the corrosion rates  
of embedded steel reinforcement in  
concrete exposed to simulated marine  
environments**

*Corrosion des métaux et alliages — Détermination des vitesses de  
corrosion de l'acier encastrés simulée de l'armature dans le béton  
exposé à l'environnement marin*

| <b>4 Apparatus</b>                                                            | <b>2</b>  |
| <b>5 Test materials</b>                                                       | <b>4</b>  |
| <b>6 Preparation of specimens</b>                                             | <b>4</b>  |
| 6.1 Reinforcing steel cleaning                                                | 4         |
| 6.2 Reinforcing steel coating ends                                            | 4         |
| 6.3 Adding industrial salt                                                    | 4         |
| 6.4 Making concrete specimens                                                 | 5         |
| <b>7 Test procedure</b>                                                       | <b>5</b>  |
| 7.1 Initial performance test                                                  | 5         |
| 7.1.1 Mechanical properties and chemical compositions of reinforcing bars     | 5         |
| 7.1.2 Mass                                                                    | 6         |
| 7.1.3 Dimensions                                                              | 6         |
| 7.1.4 Concrete strength                                                       | 6         |
| 7.2 Test data recording                                                       | 6         |
| 7.2.1 Test time                                                               | 6         |
| 7.2.2 Cracks record                                                           | 6         |
| 7.3 Breaking of specimens                                                     | 7         |
| 7.3.1 General                                                                 | 7         |
| 7.3.2 Mechanical properties                                                   | 7         |
| 7.3.3 Mass                                                                    | 7         |
| 7.3.4 Dimensions                                                              | 7         |
| <b>8 Test result</b>                                                          | <b>8</b>  |
| 8.1 Mass loss rate of test bar                                                | 8         |
| 8.2 Average mass loss rate of test bar                                        | 8         |
| 8.3 Ratio of the mass loss rate of the benchmark bar and the test bar         | 8         |
| 8.4 Average ratio of the mass loss rate of the benchmark bar and the test bar | 8         |
| <b>9 Test report</b>                                                          | <b>9</b>  |
| <b>Annex A (informative) Examples of experimental results</b>                 | <b>10</b> |
