Foreword	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	2
4 Basic requirements	3
4.1 General requirements	3
4.2 General requirements for the operator	4
4.3 Training program	4
4.4 Operating condition	7
4.4.1 Travel surface	7
4.4.2 Lighting	7
4.4.3 Aisles and obstructions	7
4.5 Pre-shift checks	7
4.6 Travel requirements	8
4.6.1 General requirements	8
4.6.2 Driving in narrow aisles	10
4.6.3 Driving over bridge plates or dockboards	11
4.6.4 Driving in lift or elevator	11
4.6.5 Driving on slopes	11
4.6.6 Driving in containers	12
4.7 Load handling	12
4.7.1 General requirements	12
4.7.2 Picking up or depositing a load	13
4.7.3 Stacking loads	14
4.7.4 Handling of suspended and liquid loads	14
4.8 Parking the truck	15
5 Additional requirements according to truck type	15
5.1 Electric trucks	15
5.1.1 General requirement for all battery type	15
5.1.2 Requirement for flooded Lead-acid battery	16
5.1.3 Requirement for lithium ion	17
5.1.4 Requirement for fuel cell	17
5.2 IC trucks	17
5.3 Towing tractors and trucks with trailers	18
5.4 Pedestrian-controlled truck	19
5.5 Counterbalance lift trucks up to 10 000 kg capacity, side-loading trucks and variable-reach trucks	20
5.6 Trucks with elevating operator position and trucks specifically designed to travel with elevated loads	20
5.7 Trucks for handling containers	20
5.8 Low-lift order-picking trucks	20
5.9 Trucks operating in potentially explosive areas	21
6 Use of attachments on the truck	21
7 Transport, towing, assembly and storage of the truck	21
7.1 Transport of the truck	21
7.2 Towing of the truck	22
7.3 Assembly of the truck	22
7.4 Storage of the truck	22
8 Truck modification	23
9 Maintenance requirements	23
Annex A (informative) Special safety considerations	26

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 110, *Industrial trucks*, Subcommittee SC 2, *Safety of powered industrial trucks*.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
