1 Scope	1
2 Normative references	1
3 Terms and definitions	2
4 Principle	3
5 Reagents and material	4
5.1 Biological material	4
5.2 Test mixtures	4
5.3 Reference substance	5
6 Apparatus	6
7 Procedure	6
7.1 Experimental design	6
7.1.1 General	6
7.1.2 Range-finding test (preliminary test)	7
7.1.3 Definitive test	7
7.1.4 Limit test	7
7.2 Preparation of test mixtures	8
7.2.1 Testing contaminated soil	8
7.2.2 Testing substances added to the test substrate	8
7.2.3 Preparation of control containers	9
7.3 Addition of the biological material	9
7.4 Test conditions and measurements	9
7.5 Feeding of the mites	9
7.6 Determination of surviving predatory mites	10
8 Calculation and expression of results	10
8.1 Calculation	10
8.2 Expression of results	10
9 Validity of the test	10
10 Statistical analysis	11
10.1 General	11
10.2 Single-concentration tests	11
10.3 Multi-concentration tests	11
10.3.1 Range-finding test	11
10.3.2 Definitive test	11
11 Test report	12
Annex A (informative) Techniques for rearing and breeding of predatory mites	14
Annex B (normative) Determination of water-holding capacity	16
Annex C (informative) Guidance on adjustment of pH of artificial soil	17
Annex D (informative) Extraction and counting of predatory mites	18
Annex E (informative) Basic information on the biology of <i>Hypoaspis (Geolaelaps) aculeifer</i>	19
Bibliography	20

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 190, *Soil quality*, Subcommittee SC 4, *Biological characterization*.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
