Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Descriptions	2
5 Quality and safety requirements and recommendations	3
5.1 General characteristics	3
5.2 Morphological features	3
5.2.1 Fresh stem	3
5.2.2 Dried stem	3
5.2.3 Processed stem	3
5.3 Thin-layer chromatography (TLC) identification	3
5.4 Moisture	3
5.5 Total ash	3
5.6 Ethanol-soluble extractives	3
5.7 Marker compounds	4
5.8 Heavy metals	4
5.9 Pesticide residues	4
6 Sampling	4
7 Test methods	4
7.1 Macroscopic identification	4
7.2 TLC identification	4
7.3 Determination of moisture content	4
7.4 Determination of total ash	4
7.5 Determination of ethanol-soluble extractives	4
7.6 Determination of marker compounds	4
7.7 Determination of heavy metals	4
7.8 Determination of pesticide residues	4
8 Test report	5
9 Packaging, storage and transportation	5
10 Marking and labelling	5
Annex A (informative) TLC identification	6
Annex B (informative) Determination of polysaccharides	7
Annex C (informative) Determination of mannose and peak area ratio of mannose to glucose	9
Annex D (informative) Reference information of national and regional requirements	12
Bibliography	13

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at <http://www.iso.org/patents>. ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 249, *Traditional medicine*, Subcommittee SC 1, *Traditional Chinese medicine*.

This second edition cancels and replaces the first edition (ISO 21370:2019), which has been technically revised.

The main changes are as follows:

- addition of the definition of "stem" in 3.1;
- addition of the definition of "*Dendrobium officinale* stem" in 3.2;
- update of Normative references and Bibliography;
- [Clause 4](#): insertion of Figure 1 a) "plant of *Dendrobium officinale* stem";
- [Annex D](#): update of the edition date of the Chinese Pharmacopoeia; addition of the data from the Korean Herbal Pharmacopoeia; removal of all data from Taiwan Herbal Pharmacopoeia.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
