Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Principle	2
5 Basic configuration	3
6 Requirements	3
6.1 Size setting error.....	3
6.2 Counting efficiency.....	3
6.3 Size resolution.....	4
6.4 False count.....	4
6.5 Maximum particle number concentration.....	4
6.6 Sampling flow rate error.....	4
6.7 Sampling time error.....	4
6.8 Sampling volume error.....	4
6.9 Calibration interval.....	4
6.10 Reporting of test and calibration results.....	4
7 Test and calibration procedures	5
7.1 Size setting.....	5
7.1.1 Evaluation of size setting error.....	5
7.1.2 Procedure of size setting.....	5
7.2 Evaluation of counting efficiency.....	9
7.3 Evaluation of size resolution.....	10
7.4 Evaluation of false count.....	11
7.5 Estimation of coincidence loss at the maximum particle number concentration.....	11
7.6 Evaluation of sampling flow rate error.....	12
7.7 Evaluation of sampling time error.....	12
7.8 Evaluation of sampling volume error.....	12
Annex A (informative) Counting efficiency	13
Annex B (informative) Size resolution	14
Annex C (informative) False count rate	15
Annex D (informative) Procedure for evaluating the uncertainties of the results of the performance tests	16
Bibliography	21

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 24., *Particle characterization including sieving*, Subcommittee SC 4, *Particle characterization*.

This second edition cancels and replaces the first edition (ISO 21501-2:2007), which has been technically revised. The main changes from the previous edition are as follows:

- [Clause 4](#) for “Principle” and [Clause 5](#) for “Basic configuration” have been added;
- “size calibration” and “verification of size setting” have been combined as “size setting error” in the requirements ([Clause 6](#));
- “Test report” (3.11 in the previous edition) has been changed to [6.10](#) on “Reporting of test and calibration results”;
- information about uncertainties has been enriched and is now the subject of [Annex D](#).

A list of all parts in the ISO 21501 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
