
**Composites and metal assemblies —
Galvanic corrosion tests of carbon
fibre reinforced plastics (CFRPs)
related bonded or fastened
structures in artificial atmospheres
— Salt spray tests**

*Assemblages composites et métal — Essais de corrosion galvanique des
structures en plastiques renforcés de fibres de carbone (CFRP) jointes
ou fixées en atmosphères artificielles — Essais au brouillard salin*

Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Test solutions	2
4.1 Preparation of the sodium chloride solution	2
4.2 pH adjustment	3
4.2.1 pH of the salt solution	3
4.2.2 Neutral salt spray test (NSS)	3
4.2.3 Acetic acid salt spray test (AASS)	3
4.2.4 Copper-accelerated acetic acid salt spray test (CASS)	3
4.3 Filtration	3
5 Apparatus	4
6 Method for evaluating cabinet corrosivity	5
6.1 General	5
6.2 Reference specimens	5
6.3 Arrangement of the reference specimens	6
6.4 Duration of tests	6
6.5 Determination of mass loss (mass per area)	6
6.6 Satisfactory performance of cabinet	6
7 Test specimens	7
8 Arrangement of the test specimens	7
9 Operating conditions	8
10 Duration of tests	8
11 Treatment of specimens after test	9
11.1 General	9
11.2 Non-organic coated specimens: metallic and/or inorganic coated	9
11.3 Organic coated specimens	9
11.3.1 Scribed organic coated specimens	9
11.3.2 Organic coated but not scribed specimens	9
12 Evaluation of results	9
13 Test report	10
Annex A (informative) Example schematic diagram of one possible design of spray cabinet for galvanic corrosion test with means for optional treating fog exhaust and drain	11
Annex B (informative) Complementary method for evaluating galvanic corrosion test cabinet corrosivity using zinc reference specimens	13
Annex C (normative) Preparation of galvanic corrosion test panels with organic coatings	15
Annex D (normative) Required supplementary information for testing galvanic corrosion test panels with organic coatings	16
Annex E (informative) Recommended specimen geometries — Salt spray tests to metal and CFRP assemblies	17
Bibliography	19

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 61, *Plastics*, Subcommittee SC 13, *Composites and reinforcement fibres*.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
