Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Evaporative emissions	2
4.1 Description of VT- SHED test	2
4.2 Test motorcycle and fuel	3
4.2.1 Test motorcycles	3
4.2.2 Test fuel	3
4.3 Test equipment	4
4.3.1 Chassis dynamometer	4
4.3.2 Evaporative emission measurement enclosure	4
4.3.3 Analytical systems	5
4.3.4 Temperature recording system	5
4.3.5 Pressure recording system	5
4.3.6 Fans	6
4.3.7 Gases	6
4.3.8 Additional equipment	6
4.4 Test procedure	6
4.4.1 Test preparation	6
4.4.2 Fuel drain and refill	7
4.4.3 Pre-soaking	7
4.4.4 Pre-conditioning drive	7
4.4.5 Fuel drain and refill	7
4.4.6 Start soaking	7
4.4.7 Carbon canister loading	7
4.4.8 Dynamometer test	8
4.4.9 Hot soak loss (HSL) test	8
4.4.10 Soak	9
4.4.11 Diurnal breathing loss (DBL) test	9
4.5 Calculation of results	10
5 Calibration of equipment for evaporative emission testing	12
5.1 Calibration frequency and methods	12
5.2 Calibration of the enclosure	12
5.2.1 Initial determination of internal volume of the enclosure	12
5.2.2 Determination of chamber background emissions	12
5.2.3 Calibration and hydrocarbon retention test of the chamber	13
5.3 Analytical systems	14
5.3.1 General	14
5.3.2 Hydrocarbon analyser	14
5.3.3 Hydrocarbon analyser data recording system	15
5.3.4 Checking of FID hydrocarbon analyser	15
6 Presentation of results	16
6.1 The evaporative emission	16
6.2 Test report	16
Annex A (normative) Presentation of results for evaporative emissions	17
Bibliography	20

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents. ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 22, *Road vehicles*, Subcommittee SC 38, *Motorcycles and mopeds*.

A list of all parts in the ISO 21755 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
