Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 General concepts	4
5 Cell transportation specification	5
5.1 General	5
5.2 Items specified in the cell transportation specification	5
5.2.1 General	5
5.2.2 Information reflected in the cell transportation specification	5
5.2.3 Capability of the cell transportation service provider and its external service provider(s)	6
5.3 Risk management, verification and validation	9
5.3.1 Risk management	9
5.3.2 Verification and validation	10
6 Best practices for shipping container and labelling	10
6.1 General	10
6.2 Shipping container	11
6.2.1 Shipping container systems	11
6.2.2 Shipping container requirements	11
6.3 Labelling of the shipping container	12
6.3.1 Information to be labelled	12
6.3.2 Physical requirements for the label	13
6.3.3 Handling of labels	13
7 Operation	13
7.1 General operation	13
7.1.1 General	13
7.1.2 Preparation of shipment	13
7.1.3 Transportation	13
7.1.4 Inspection at the time of delivery	14
7.2 Traceability	14
7.3 System to handle exceptional operations	15
7.3.1 Emergency handling	15
7.3.2 Management in case of an incident	15
8 Organization	16
8.1 General	16
8.2 Personnel training	16
8.2.1 General	16
8.2.2 Training plans	16
8.2.3 Training records	17
8.3 Quality management system (QMS) considerations	17
9 Storage facility	18
9.1 General	18
9.2 Storage facility considerations	18
10 Documented information	18
Bibliography	19

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 276, *Biotechnology*.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
