Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	2
4 Guidance on emergency measurement	4
4.1 Objective of a specific rapid measurement.....	4
4.2 Routine screening levels versus intervention levels	4
4.3 Operational intervention levels (OILs) from EU, USA and IAEA.....	5
5 Rapid measurements	5
5.1 Adaptation of the methods used.....	5
5.2 Sampling.....	6
5.3 Rapid test methods.....	6
5.3.1 Pre-screening: Identification of most contaminated samples	6
5.3.2 Selection of the analytical strategy	6
5.3.3 Appropriate sample volumes and counting times related to intervention levels ...	9
5.3.4 Gross-alpha and gross-beta determination and gamma spectrometry.....	10
5.3.5 Specific separations for alpha emitters or pure beta emitters measurement.....	11
6 Laboratory management to perform rapid measurements	12
6.1 Protection of laboratory staff.....	12
6.2 Sample management.....	12
6.3 Material and staff.....	12
6.4 Quality management.....	13
6.5 Expression of results and test report.....	13
Annex A (informative) World Health Organization screening for radionuclides in drinking water	14
Annex B (informative) Operational Intervention Levels (OILs) from EU, US and IAEA	15
Annex C (informative) Overview of different types of rapid measurements during a nuclear or radiological emergency	16
Annex D (informative) Example of a decision scheme for rapid measurements in the early phase	18
Bibliography	19

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 147, *Water quality*, SC 3, *Radioactivity measurements*.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
