|--------------------------------------------------------------|-----------|
| <b>Foreword</b>                                              | <b>v</b>  |
| <b>1 Scope</b>                                               | <b>1</b>  |
| <b>2 Normative references</b>                                | <b>1</b>  |
| <b>3 Terms and definitions</b>                               | <b>1</b>  |
| <b>4 Classification — Designation</b>                        | <b>3</b>  |
| 4.1 General                                                  | 3         |
| 4.2 Type                                                     | 4         |
| 4.3 Actuator duty classification                             | 4         |
| 4.4 Action on loss of external electric power                | 4         |
| 4.4.1 Stay put action                                        | 4         |
| 4.4.2 Fail-safe action                                       | 4         |
| <b>5 Design requirements</b>                                 | <b>4</b>  |
| 5.1 Endurance                                                | 4         |
| 5.1.1 General                                                | 4         |
| 5.1.2 Part-turn actuators                                    | 5         |
| 5.1.3 Multi-turn actuators                                   | 5         |
| 5.1.4 Linear actuators                                       | 5         |
| 5.2 Environmental conditions                                 | 6         |
| 5.2.1 General                                                | 6         |
| 5.2.2 Ambient temperature and humidity                       | 6         |
| 5.2.3 Altitude                                               | 6         |
| 5.2.4 Enclosure protection                                   | 6         |
| 5.2.5 External corrosion protection                          | 6         |
| 5.2.6 Vibrations, shock and seismic conditions               | 7         |
| 5.3 Actuator attachment                                      | 7         |
| 5.3.1 Part-turn actuators                                    | 7         |
| 5.3.2 Multi-turn actuators                                   | 7         |
| 5.3.3 Linear actuators                                       | 7         |
| 5.4 Primary closing direction                                | 8         |
| 5.5 Fail-safe direction                                      | 8         |
| 5.6 Electrical connections — Cable entries                   | 8         |
| 5.7 Self-locking/braking                                     | 8         |
| 5.8 Performance                                              | 9         |
| 5.8.1 Power supply tolerances                                | 9         |
| 5.8.2 Actuator duty performances                             | 9         |
| 5.8.3 Operating time and speed                               | 10        |
| 5.9 Basic design requirements                                | 11        |
| 5.9.1 Motors                                                 | 11        |
| 5.9.2 Gearing lubricant                                      | 11        |
| 5.9.3 Manual operation                                       | 11        |
| 5.9.4 Travel limitation                                      | 11        |
| 5.9.5 Torque/thrust limitation                               | 12        |
| 5.9.6 Structural integrity                                   | 12        |
| 5.9.7 End stop adjustment for part-turn and linear actuators | 12        |
| 5.9.8 Noise                                                  | 12        |
| <b>6 Optional equipment</b>                                  | <b>12</b> |
| 6.1 General                                                  | 12        |
| 6.2 Anti-condensation heater                                 | 12        |
| 6.3 Position transmitter                                     | 13        |
| 6.4 Actuator running transmitter                             | 13        |
| 6.5 Additional position and/or torque signalling             | 13        |
| 6.6 Local control station                                    | 13        |

|                              |                                                |           |
|------------------------------|------------------------------------------------|-----------|
| 6.7                          | Local position indication .....                | 13        |
| 6.8                          | Actuator electrical controls .....             | 13        |
| 6.8.1                        | General .....                                  | 13        |
| 6.8.2                        | Positioner .....                               | 13        |
| 6.8.3                        | Controller .....                               | 13        |
| 6.8.4                        | Speed control .....                            | 13        |
| 6.8.5                        | Field bus system interface .....               | 14        |
| 6.8.6                        | Torque transmitter (analogue or digital) ..... | 14        |
| 6.8.7                        | Actuator performance data logger .....         | 14        |
| <b>7</b>                     | <b>Type and production test .....</b>          | <b>14</b> |
| 7.1                          | General .....                                  | 14        |
| 7.2                          | Type tests .....                               | 14        |
| 7.3                          | Control of production process .....            | 15        |
| <b>8</b>                     | <b>Marking .....</b>                           | <b>16</b> |
| 8.1                          | General .....                                  | 16        |
| 8.2                          | Mandatory marking .....                        | 16        |
| 8.3                          | Optional marking .....                         | 16        |
| <b>9</b>                     | <b>Documentation .....</b>                     | <b>17</b> |
| 9.1                          | General .....                                  | 17        |
| 9.2                          | Mandatory documentation .....                  | 17        |
| 9.3                          | Optional documentation .....                   | 17        |
| <b>10</b>                    | <b>Packaging .....</b>                         | <b>17</b> |
| <b>Annex A</b> (normative)   | <b>Endurance test procedure .....</b>          | <b>18</b> |
| <b>Annex B</b> (informative) | <b>Actuator selection guidelines .....</b>     | <b>19</b> |
| <b>Annex C</b> (informative) | <b>Load profiles .....</b>                     | <b>21</b> |
| <b>Bibliography</b> .....    |                                                | <b>24</b> |

ISO 22153:2020

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see [www.iso.org/directives](http://www.iso.org/directives)).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see [www.iso.org/patents](http://www.iso.org/patents)).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see [www.iso.org/iso/foreword.html](http://www.iso.org/iso/foreword.html).

This document was prepared by Technical Committee ISO/TC 153, *Valves*.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at [www.iso.org/members.html](http://www.iso.org/members.html).
