Foreword.....	iv
1 Scope.....	1
2 Normative references.....	1
3 Terms and definitions.....	1
4 Principle.....	1
5 Safety precautions.....	1
6 Reagents.....	2
7 Apparatus.....	2
8 Procedure.....	3
8.1 Sample.....	3
8.2 Extraction.....	3
8.3 Purification.....	3
8.4 Calibration solutions.....	4
8.4.1 Preparation of calibration solution mixture.....	4
8.4.2 Preparation of calibration mixture for recovery rate.....	4
8.5 Preparation of blank sample.....	4
8.6 Analysis by GC-MS.....	4
8.7 Check of the analytical system.....	4
9 Evaluation of results.....	5
9.1 Calculation of results.....	5
9.2 Reliability of the method.....	5
10 Test report.....	5
Annex A (normative) 24 kinds of pesticide compounds.....	6
Annex B (informative) GC-MS chromatographic conditions and parameters.....	7
Annex C (informative) Retention time, quantitative and qualitative ions and ion abundance ratios.....	8
Annex D (informative) Start time and dwell time of each group of detecting ions.....	9
Annex E (informative) Chromatogram and selected ion of the 24 pesticides standard obtained by GC-MS.....	10
Annex F (informative) Recovery range of pesticides in leather (n = 6).....	11
Annex G (informative) Precision.....	13
Bibliography.....	15

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see www.iso.org/iso/foreword.html.

This document was prepared by the Chemical Tests Commission of the International Union of Leather Technologists and Chemists Societies (IUC Commission, IULTCS) in collaboration with the European Committee for Standardization (CEN) Technical Committee CEN/TC 289, *Leather*, the secretariat of which is held by UNI, in accordance with the Agreement on technical cooperation between ISO and CEN (Vienna Agreement).

IULTCS, originally formed in 1897, is a world-wide organization of professional leather societies to further the advancement of leather science and technology. IULTCS has three Commissions, which are responsible for establishing international methods for the sampling and testing of leather. ISO recognizes IULTCS as an international standardizing body for the preparation of test methods for leather.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
