Foreword	v
Introduction	vi
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Abbreviated terms	3
5 Application of RO treatment systems for reclaimed water	3
5.1 Overview.....	3
5.2 Design considerations.....	4
5.2.1 Safety considerations.....	4
5.2.2 Stability considerations.....	4
5.2.3 Economy considerations.....	4
5.3 RO system components.....	4
5.3.1 General.....	4
5.3.2 Feed water source.....	5
5.3.3 Pre-treatment unit.....	5
5.3.4 RO treatment unit.....	5
5.3.5 Auxiliary equipment.....	5
5.3.6 Post treatment unit.....	5
5.3.7 Water quality and performance monitoring system.....	5
6 Technical considerations of pre-treatments	5
6.1 Quality considerations of feed water.....	5
6.1.1 General water quality index.....	5
6.1.2 Silt density index.....	6
6.1.3 Organic index.....	6
6.1.4 Biological index.....	7
6.1.5 Oxidation-reduction potential.....	7
6.2 Selection of mechanical pre-treatments.....	7
6.2.1 Clarification.....	7
6.2.2 Media/Multimedia filtration.....	7
6.2.3 Activated carbon filtration.....	7
6.2.4 Microfiltration and ultrafiltration.....	8
6.2.5 Cartridge filtration.....	8
6.3 Chemical pre-treatments.....	8
6.3.1 Antiscalants.....	8
6.3.2 Chemical oxidizers for disinfection of the feed.....	8
6.3.3 Reductants.....	8
6.3.4 Non-oxidizing biocides.....	8
7 Technical and structural considerations of RO unit	8
7.1 Components.....	8
7.1.1 RO feed pumps.....	8
7.1.2 RO membrane modules.....	9
7.1.3 Pressure vessels.....	9
7.2 Selection of RO membranes.....	9
7.2.1 Membrane materials.....	9
7.2.2 Membrane modules.....	10
7.3 RO unit configuration.....	10
8 Operating conditions and maintenance system	11
8.1 Operating conditions.....	11
8.1.1 Pressure.....	11
8.1.2 Temperature.....	11

8.1.3	Feed water flow and permeate flux.....	11
8.1.4	Concentrate flow.....	11
8.1.5	pH.....	12
8.2	RO performance parameters.....	12
8.2.1	Permeate flow rate.....	12
8.2.2	Salt rejection.....	13
8.2.3	Pressure drop.....	13
8.3	Automatic chemical dosing system.....	13
8.3.1	Dosing point.....	13
8.3.2	Dosing method.....	13
8.4	Control and monitor system of RO performance.....	13
8.4.1	Instrumentation.....	13
8.4.2	Control system.....	14
8.4.3	Monitoring system.....	14
8.5	Cleaning system.....	14
8.5.1	Physical cleaning.....	14
8.5.2	Chemical cleaning.....	14
8.6	Integrity testing of RO systems.....	15
8.7	System failure.....	16
9	Post-treatment unit.....	17
10	RO concentrate management.....	17
11	Emergency response plan.....	17
Annex A (informative) Example of an RO treatment system for reclaimed water.....		19
Annex B (informative) Information of chlorine disinfection for the influent of an RO system.....		20
Annex C (informative) Maturity level of technologies applied to RO concentrate treatment.....		21
Bibliography.....		22

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2. www.iso.org/directives

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received. www.iso.org/patents

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the WTO principles in the Technical Barriers to Trade (TBT) see the following URL: Foreword - Supplementary information

This document was prepared by Technical Committee ISO/TC 282, *Water reuse*, Subcommittee SC 2, *Water reuse in urban areas*.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
