Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms, definitions, symbols and abbreviated terms	1
3.1 Terms and definitions.....	1
3.2 Symbols and abbreviated terms.....	1
4 Experimental boundary conditions with respect to the sample	2
5 Experimental boundary conditions with respect to the measurement	3
6 Model-correlated boundary conditions of the simulation	4
7 Basic models	4
7.1 General.....	4
7.2 Bulk material (case 1 of application).....	5
7.3 Transparent single layer (case 2 of application).....	5
7.4 Semi-transparent single layer (case 3 of application).....	5
7.5 Multiple layers and periodic layers (case 4 of application).....	5
7.6 Effective materials (case 5 of application).....	5
8 Raw data	5
9 Verification of correct adjustment of the device	5
9.1 Straight line measurement.....	5
9.2 Simple measurement of angles.....	6
9.2.1 Measurement on a known sample, e.g. SiO ₂ /Si, with fitting of the angle of incidence.....	6
9.2.2 Measurement of the Brewster's angle of water, of a solvent or of technical glass.....	8
10 Verification of the device regarding correct calibration	9
11 Test report	9
Annex A (informative) Mathematical and physical principles of ellipsometry	10
Bibliography	15

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 107, *Metallic and other inorganic coatings*.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
