Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
3.1 Boundary conditions.....	1
3.2 Optical properties.....	2
3.3 Calculated parameters.....	5
3.4 Definition of bulk absorption filters by their function.....	6
4 Measurement	7
4.1 General.....	7
4.2 Measurement conditions.....	7
5 Numerical specification and graphical representation of spectral characteristics	7
5.1 General.....	7
5.2 Rules for the numerical specification of spectral characteristics.....	8
5.2.1 Rules for the spectral characteristics, τ_i , τ , τ_V , a , E , D or θ	8
5.2.2 Rules for the cut-off wavelength and peak transmittance.....	8
5.3 Rules for the graphical representation of spectral characteristics.....	9
5.4 Graphical representation of optical functions.....	10
5.4.1 General.....	10
5.4.2 Attenuating function (ND).....	10
5.4.3 Function bandpass (BP) or bandrejection (BR).....	11
5.4.4 Function shortpass (SP) or longpass (LP).....	13
Annex A (informative) Graphical representation of transmission using a diabatic scale as an ordinate	15
Annex B (informative) Recommendation for the thickness of the witness sample	17
Annex C (informative) Spectral weighting function for luminous transmittance	19
Bibliography	20

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 172, *Optics and photonics*, Subcommittee SC 3, *Optical materials and components*.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
