4.1 Multielectrode arrays.....	3
4.2 Coupled multielectrode array (CMA).....	3
4.3 Multielectrode array with closely packed electrodes for studying spatiotemporal behaviour of localized corrosion.....	4
4.4 Coupled multielectrode array sensor (CMAS).....	5
4.4.1 CMAS for corrosion monitoring.....	5
4.4.2 CMAS used without polarization to measure corrosion rate at free corrosion potential.....	6
4.4.3 CMAS used to evaluate the effectiveness of cathodic protection and the effect of stray current.....	6
4.5 Multielectrode arrays for high throughput measurements.....	7
4.6 Multielectrode arrays for other applications.....	7
<b>5 Instrumentation</b> .....	<b>8</b>
5.1 Potential measurement.....	8
5.2 Coupling current measurement.....	8
5.3 Effective coupling of individual electrodes.....	9
5.3.1 Coupling with multichannel ZVA.....	9
5.3.2 Coupling with wires and measuring current with a single ZVA.....	10
<b>6 Fabrication of multielectrode array</b> .....	<b>10</b>
6.1 Electrode preparation.....	10
6.2 Number of electrodes.....	10
6.3 Mounting of electrodes.....	11
6.4 Surface coating on electrodes for preventing crevice corrosion.....	11
6.5 Electrode configuration.....	11
6.6 Size of electrodes.....	11
6.7 Spacing of electrodes for spatiotemporal studies.....	12
6.8 Spacing of electrodes for corrosion monitoring in oil and gas application.....	12
6.9 Size and spacing of the electrodes for high throughput studies.....	12
<b>7 Test procedure</b> .....	<b>12</b>
<b>8 Test report</b> .....	<b>13</b>
<b>Annex A (informative) Typical results from multielectrode array with closely packed electrodes for studying spatiotemporal behaviour of localized corrosion</b> .....	<b>14</b>
<b>Annex B (informative) Typical results from a CMAS for corrosion monitoring</b> .....	<b>15</b>
<b>Annex C (informative) Example reports</b> .....	<b>17</b>
<b>Bibliography</b> .....	<b>18</b>

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see [www.iso.org/directives](http://www.iso.org/directives)).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see [www.iso.org/patents](http://www.iso.org/patents)).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see [www.iso.org/iso/foreword.html](http://www.iso.org/iso/foreword.html).

This document was prepared by Technical Committee ISO/TC 156, *Corrosion of metals and alloys*.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at [www.iso.org/members.html](http://www.iso.org/members.html).
