Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Principle	2
5 Sampling	2
5.1 Method and equipment.....	2
5.2 Sub-sampling.....	3
5.3 Sample preservation.....	3
5.3.1 Preservation method before analysis.....	3
5.3.2 Preservation method after analysis.....	3
5.4 Recording sample information.....	3
6 Procedures for imaging flow cytometry (morphological analysis)	3
6.1 Pre-processing of samples.....	3
6.2 Observation using imaging flow cytometer.....	3
6.3 Image processing.....	3
7 Procedures for metagenomic analysis (molecular analysis)	4
7.1 General.....	4
7.2 Nucleic acids (DNA/RNA) extraction.....	4
7.3 PCR primers.....	4
7.4 PCR protocol.....	4
7.4.1 DNA.....	4
7.4.2 RNA (cDNA library production).....	4
7.5 Check and purification of PCR amplicon.....	4
7.6 Index PCR.....	5
7.7 Purification of amplicon by magnetic beads.....	5
7.8 Concentration measurement.....	5
7.9 Quality check for amplicon by an automated electrophoresis system using microfluidic chip.....	5
7.10 Sequencing by a next generation sequencer.....	5
7.11 Data processing.....	5
8 Data and sample management	5
9 Combination of morphological analysis and molecular analysis (integrated analysis)	5
Annex A (informative) Example procedure for the analysis of the meiofaunal community by imaging flow cytometry	7
Annex B (informative) Example procedure for analysis of meiofaunal community by NGS	10
Annex C (informative) Example procedure for quantitative analysis of meiofaunal community by NGS	13
Annex D (informative) Useful information for users	16
Bibliography	17

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 8, *Ships and marine technology*, Subcommittee SC 13, *Marine technology*.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
