Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Principle	2
5 Materials	3
5.1 Test alga	3
5.2 Reagents	3
5.2.1 Water	3
5.2.2 Growth medium	3
5.2.3 Nutrient, metal and tris stock solutions	3
6 Apparatus	4
6.1 General	4
6.2 High sensitivity luminometer	4
6.3 Incubator and tube shaker	4
6.4 Apparatus for determining algal cell density	4
6.5 Culture tubes	4
6.6 Clean bench	4
7 Preparations at a land-based laboratory	4
7.1 Preparation of the growth medium	4
7.2 Preparation of the algal stock culture	5
8 Test procedure on-board	5
8.1 Preparation of the algal inoculum culture	5
8.2 Choice of the test concentrations	5
8.3 Preparation of the test medium	6
8.4 Inoculation and incubation	6
9 DF measurement	6
10 Interpretation of data	6
10.1 Plotting the DF decay curve	6
10.2 Calculation of per cent inhibition	7
11 Interpretation of the results	7
12 Test report	7
Annex A (informative) Schematic overview and procedures of the on-board bioassay	9
Annex B (informative) Preparation of the test medium in seawater	12
Annex C (informative) Practical procedures for the on-board bioassay and schematic diagram of the high sensitivity luminometer	13
Annex D (informative) Cryopreservation procedure	14
Annex E (informative) Reference data for checking the appropriateness of the test procedures	15
Bibliography	16

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organisations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 8, *Ships and marine technology*, Subcommittee SC 13, *Marine technology*.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
