Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Information on the ship and fuel oil consumers	2
4.1 Ship particulars.....	2
4.2 Ship fuel oil consumers.....	3
5 Methods to measure the fuel oil consumption	3
5.1 General.....	3
5.2 Use of bunker delivery notes (BDNs).....	3
5.2.1 Annual fuel oil consumption.....	3
5.2.2 Information from the bunker delivery note.....	4
5.3 Use of flow meters.....	5
5.4 Use of fuel oil tank monitoring.....	5
5.4.1 Remote sounding gauge.....	5
5.4.2 Manual sounding measurement.....	5
6 Method to measure the distance travelled	5
7 Method to measure the hours underway	6
8 Aggregated data report	6
9 Data quality control	6
9.1 Bunker delivery notes (BDN).....	6
9.2 Flow meter.....	6
9.3 Fuel oil tank monitoring.....	7
9.3.1 Remote sounding gauge.....	7
9.3.2 Manual sounding measurement.....	7
9.4 Distance travelled.....	7
9.5 Hours underway.....	8
10 Direct CO₂ emissions measurement	8
Annex A (informative) Example of a ship fuel oil consumption data collection plan	9
Annex B (informative) Guidance on technical specifications and test requirements for automatic data collection systems using fuel flow rate measuring devices for fuel consumption	12
Annex C (normative) Standardized data reporting format for the data collection system	15
Bibliography	16

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 8, *Ships and marine technology*, Subcommittee SC 2, *Marine environment protection*.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
