<b>1 Scope</b>	1
<b>2 Normative references</b>	1
<b>3 Terms and definitions</b>	1
<b>4 Descriptions</b>	2
<b>5 Quality and safety requirements and recommendations</b>	4
5.1 General characteristics	4
5.2 Morphological features	4
5.2.1 <i>Curcuma phaeocaulis</i> rhizome	4
5.2.2 <i>Curcuma kwangsiensis</i> rhizome	5
5.2.3 <i>Curcuma wenyujin</i> rhizome	5
5.3 Identification	5
5.3.1 Microscopic identification	5
5.3.2 Thin-layer chromatography (TLC) identification	8
5.3.3 High performance liquid chromatography (HPLC) identification	8
5.4 Moisture	8
5.5 Total ash	8
5.6 Acid-insoluble ash	8
5.7 Residual sulfur dioxide	8
5.8 Ethanol-soluble extractives	8
5.9 Essential oil	8
5.10 Marker compound(s)	8
5.11 Heavy metals	8
5.12 Pesticide residues	8
<b>6 Sampling</b>	9
<b>7 Test methods</b>	9
7.1 Macroscopic identification	9
7.2 Microscopic identification	9
7.3 Thin-layer chromatography (TLC) identification	9
7.4 High performance liquid chromatography (HPLC) identification	9
7.5 Determination of moisture	9
7.6 Determination of total ash	9
7.7 Determination of acid-insoluble ash	9
7.8 Determination of residual sulfur dioxide	9
7.9 Determination of ethanol-soluble extractives	9
7.10 Determination of essential oil	9
7.11 Determination of marker compounds	9
7.12 Determination of heavy metals	9
7.13 Determination of pesticide residues	10
<b>8 Test report</b>	10
<b>9 Packaging, storage and transportation</b>	10
<b>10 Marking and labelling</b>	10
<b>Annex A (informative) Thin-layer chromatography (TLC) identification</b>	11
<b>Annex B (informative) High performance liquid chromatography (HPLC) identification and determination of germacrene content</b>	13
<b>Annex C (informative) National and regional quality requirements for <i>Curcuma</i> rhizome</b>	16
<b>Bibliography</b>	18

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see [www.iso.org/directives](http://www.iso.org/directives)).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at [www.iso.org/patents](http://www.iso.org/patents). ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see [www.iso.org/iso/foreword.html](http://www.iso.org/iso/foreword.html).

This document was prepared by Technical Committee ISO/TC 249, *Traditional medicine*, Subcommittee SC 1, *Traditional Chinese medicine*.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at [www.iso.org/members.html](http://www.iso.org/members.html).
