
**Rubber hoses and hose assemblies,
wire or textile reinforced, for dredging
applications — Specification**

*Tuyaux et flexibles en caoutchouc, à armature textile ou métallique,
pour des applications de dragage — Spécifications*

Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Classification	2
4.1 Classes.....	2
4.2 Grades.....	2
5 Materials and construction	3
5.1 Hoses.....	3
5.2 Flotation material.....	3
5.3 End fittings and end connections.....	4
6 Dimension and tolerances	4
6.1 Diameters.....	4
6.2 Hose assembly length.....	5
7 Physical properties	5
7.1 Rubber compounds.....	5
7.1.1 Abrasion resistance of lining.....	5
7.1.2 Tear strength of lining.....	5
7.1.3 Rebound resilience of lining.....	5
7.1.4 Ozone resistance of cover.....	5
7.2 Performance requirements.....	6
7.2.1 Hydrostatic requirements.....	6
7.2.2 Change in length.....	6
7.2.3 Bending test.....	7
7.2.4 Leakage of hose assemblies (proof pressure test).....	7
7.2.5 Minimum reserve buoyancy.....	7
7.2.6 Flotation material recovery.....	8
7.2.7 Adhesion between components.....	8
7.2.8 Adhesion between end fitting and lining.....	8
7.2.9 Minimum tensile strength of empty hose assemblies.....	9
7.2.10 Vacuum resistance.....	9
7.2.11 Dimensions of flange and other connections.....	9
7.2.12 Visual examination.....	9
7.3 Frequency of testing.....	9
8 Test certificate or report	10
9 Marking	10
10 Recommendations for packaging and storage	10
Annex A (normative) Type tests and routine tests	11
Annex B (normative) Measurement of adhesion between end fitting and lining	12
Annex C (normative) Hose assembly tensile-strength test	15
Bibliography	18

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 45, *Rubber and rubber products*, Subcommittee SC 1, *Rubber and plastics hoses and hose assemblies*.

This third edition cancels and replaces the second edition (ISO 28017:2011), of which it constitutes a minor revision. The changes compared to previous edition are as follows: the Amendment ISO 28017:2011/Amd 1:2015 has been incorporated and the normative references have been updated.
