<b>Foreword</b> .....	<b>vii</b>
<b>Introduction</b> .....	<b>viii</b>
<b>1 Scope</b> .....	<b>1</b>
<b>2 Normative references</b> .....	<b>2</b>
<b>3 Terms and definitions</b> .....	<b>4</b>
3.1 General.....	4
3.2 Input, energy balance, and resource recovery.....	5
3.3 Performance.....	7
3.4 Operability.....	9
3.5 Outputs.....	9
3.6 Abbreviated terms.....	10
<b>4 General requirements</b> .....	<b>11</b>
4.1 Industrial design and manufacture.....	11
4.2 Hazard and operability study and risk assessment.....	11
4.3 Ambient operation conditions.....	11
4.4 Expected technical lifetime.....	11
4.5 Treatment unit input.....	12
4.5.1 Input types.....	12
4.5.2 Specification of input parameters and ranges.....	12
4.6 Requirements for handling of faecal sludge.....	12
4.6.1 Reception of faecal sludge.....	12
4.6.2 Storage of faecal sludge.....	12
4.6.3 Feeding system.....	13
4.6.4 Drying facilities.....	13
<b>5 Energy balance and resource recovery</b> .....	<b>13</b>
5.1 General.....	13
5.2 Energy balance.....	13
5.2.1 Energy independence.....	13
5.2.2 Energy positive.....	14
5.3 Resource recovery.....	14
<b>6 Performance requirements</b> .....	<b>14</b>
6.1 Technical process availability.....	14
6.1.1 Mean time between failure (MTBF).....	14
6.1.2 Mean time to repair (MTTR).....	14
6.1.3 Preventive maintenance time ( $T_{pm}$ ).....	14
6.2 Process reliability.....	15
6.2.1 Process stability.....	15
6.2.2 Start reliability and start time.....	15
6.2.3 Shut-off reliability and shut-off time.....	15
<b>7 Safety and functional requirements</b> .....	<b>15</b>
7.1 Applicability.....	15
7.2 Process control.....	15
7.2.1 General.....	15
7.2.2 Degree of automation.....	15
7.2.3 Intentional starting of operation.....	15
7.2.4 Intentional stopping of operation.....	16
7.2.5 Emergency stop.....	16
7.2.6 Continuous monitoring.....	16
7.2.7 Feedback of process failures.....	16
7.2.8 Safety-related functions of the control system.....	16
7.2.9 Input overload protection monitoring.....	17
7.2.10 Overpressure protection.....	17

7.2.11	Fire and overheating prevention	17
7.2.12	Explosion prevention	17
7.3	Process redundancy	18
7.4	Material fire resistance	18
7.5	Security of electrical energy supply	18
7.5.1	Safety and security	18
7.5.2	Security of external electrical energy supply	18
7.5.3	Security of internal electrical energy supply	18
7.6	Safety requirements for electrical energy supply	18
7.6.1	Separation and isolation	18
7.6.2	Electrical energy discharge	19
7.6.3	Overvoltage protection	19
7.7	Structures and supporting elements	19
7.7.1	Structural integrity	19
7.7.2	Integrity against external impacts	19
7.8	Sanitary requirements	20
7.8.1	Hygienic design	20
7.8.2	Materials	20
7.8.3	System tightness	20
7.8.4	Leakage protection	20
7.9	Mechanical requirements	20
7.9.1	Pressurized equipment	20
7.9.2	Pipes, hoses and fittings	20
7.9.3	Tanks and vessels	21
7.9.4	Moving and rotating parts	21
7.9.5	Vibration	21
7.10	Radiation	21
7.10.1	High temperatures of parts and surfaces	21
7.10.2	Low temperatures of parts and surfaces	21
7.10.3	Electromagnetic compatibility	21
7.10.4	Other radiation emissions	21
7.11	Electronic and electrical components	22
<b>8</b>	<b>Operability</b>	<b>22</b>
8.1	Safe loading	22
8.2	Anthropometric design	22
8.2.1	General	22
8.2.2	Forces to be applied	22
8.2.3	Accesses and stairs	22
8.2.4	Aisles and platforms	22
8.3	Lighting	23
8.4	Operator system ergonomic design	23
8.5	Operator personal protection	23
<b>9</b>	<b>Maintainability</b>	<b>23</b>
9.1	Adjustability and maintainability	23
9.1.1	Identification of adjustment and maintenance needs	23
9.1.2	Ease of maintenance of devices, components and subassemblies	23
9.2	Access to adjustment, and maintenance points	23
9.3	Requirements for adjustment and maintenance activities	24
9.3.1	Discharge and cleaning, testability, adjustment, and maintenance on the running unit	24
9.3.2	Safe handling of electrical equipment	24
9.4	Spare parts	24
9.5	Tools and devices	24
<b>10</b>	<b>Outputs</b>	<b>24</b>
10.1	General	24
10.2	Solid	24
10.2.1	Pathogens and indicator organisms	24

10.2.2	Requirements for trace elements in solid outputs .....	25
10.2.3	Alternative requirements for solids for disposal .....	25
10.3	Effluent .....	26
10.3.1	Pathogens and indicator organisms .....	26
10.3.2	Environmental parameters .....	26
10.3.3	Requirements for trace elements in effluent outputs .....	27
10.4	Air emissions .....	27
10.5	Odour .....	28
10.6	Noise .....	28
<b>11</b>	<b>Testing .....</b>	<b>29</b>
11.1	General .....	29
11.2	Type tests .....	29
11.3	Performance testing .....	31
11.3.1	Test conditions .....	31
11.3.2	Test duration .....	32
11.4	Input characterisation and sampling .....	32
11.5	Solid and effluent .....	33
11.5.1	Pathogens and indicator organisms in solid outputs and effluent .....	33
11.5.2	Trace elements in solid outputs .....	33
11.5.3	Environmental parameters for effluent .....	33
11.5.4	Trace elements in effluent outputs .....	34
11.5.5	Sample planning .....	34
11.5.6	Measurement principles .....	35
11.5.7	Sampling location .....	35
11.5.8	Output sampling type and frequency .....	35
11.5.9	Sample size .....	36
11.5.10	Sampling method .....	38
11.5.11	Sample storage .....	38
11.6	Air emissions .....	38
11.6.1	Measurement planning .....	39
11.6.2	Measurement principles .....	39
11.6.3	Equipment specification .....	40
11.6.4	Equipment calibration .....	40
11.6.5	Sampling location .....	40
11.6.6	Normalizing of measured pollutants .....	40
11.6.7	Reference conditions .....	41
11.7	Odour .....	41
11.7.1	Test methods for odour output .....	41
11.7.2	Measurement planning .....	42
11.7.3	Measurement principles .....	42
11.7.4	Sampling location requirements .....	42
11.7.5	Measurement process .....	43
11.7.6	Additional equipment considerations .....	43
11.7.7	Sample collection .....	43
11.7.8	Minimum requirements for reporting .....	44
11.7.9	Determination of the odour concentration in the laboratory .....	45
11.7.10	Dispersion modelling .....	46
11.7.11	Real measured values, treatment unit data and design data as input .....	47
11.8	Noise .....	47
11.8.1	Test methods .....	47
11.8.2	Measurement planning .....	48
11.8.3	Requirements for the sampling location .....	48
11.8.4	Measurement methods and parameters .....	50
11.8.5	Measurement equipment .....	50
11.8.6	Calibration .....	50
11.8.7	Operation of treatment unit during test .....	50
11.8.8	Sound level meter setting .....	50
11.8.9	Microphone orientation .....	50

11.8.10	Correction for background noise and reflecting surfaces in test environment ...	51
<b>12</b>	<b>Product literature</b> .....	<b>51</b>
12.1	General.....	51
12.2	Input.....	51
12.3	Performance claims.....	52
12.4	Unit boundaries.....	52
12.5	Energy independence assessment.....	52
12.6	Environmental sustainability.....	53
12.6.1	Consumables.....	53
12.6.2	Greenhouse gas (GHG) emissions.....	54
12.6.3	Characteristics of resource recovered products.....	54
12.7	Maintenance and operator documentation.....	54
12.7.1	Language requirements.....	54
12.7.2	Provision of manual.....	54
12.7.3	Information to be provided.....	54
12.7.4	Recurring operation and maintenance.....	56
12.7.5	Complexity of configuration, adjustment, and maintenance activities.....	56
12.7.6	Labelling and marking.....	57
<b>Annex A</b> (informative)	<b>Input specification templates</b> .....	<b>58</b>
<b>Annex B</b> (informative)	<b>Sustainability</b> .....	<b>61</b>
<b>Bibliography</b>	.....	<b>65</b>

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see [www.iso.org/directives](http://www.iso.org/directives)).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see [www.iso.org/patents](http://www.iso.org/patents)).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see [www.iso.org/iso/foreword.html](http://www.iso.org/iso/foreword.html).

This document was prepared by Project Committee ISO/PC 318, *Community scale resource-oriented sanitation treatment systems*.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at [www.iso.org/members.html](http://www.iso.org/members.html).
