
**Framework for integration and
operation of smart community
infrastructures —**

**Part 1:
Recommendations for considering
opportunities and challenges from
interactions in smart community
infrastructures from relevant aspects
through the life cycle**

*Cadre pour l'intégration et l'exploitation des infrastructures
communautaires intelligentes —*

<https://standards.iteh.ai/catalog/standard/ISO/37155-1/2020-01-01> *Partie 1: Recommandations pour la prise en compte des opportunités
et des défis découlant des interactions dans les infrastructures
communautaires intelligentes, des aspects pertinents tout au long du
cycle de vie*

Foreword	v
Introduction	vi
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Understanding of smart community infrastructure layers	4
4.1 Smart community infrastructure system layer.....	4
4.2 Smart community infrastructure layer.....	4
4.3 Smart community sub-infrastructure layer.....	4
5 Benefits of applying this document	4
5.1 General.....	4
5.2 General benefits.....	4
5.3 Benefits for community authorities.....	5
5.4 Benefits for investors or lenders.....	5
5.5 Benefits for developers, infrastructure owners and operators.....	5
5.6 Benefits for service providers.....	5
5.7 Benefits for people in smart communities.....	5
6 Life cycle phases of smart community infrastructure	6
6.1 General.....	6
6.2 Initiation (phase 1).....	6
6.2.1 Smart community concept (phase 1-1).....	6
6.3 Design of target infrastructures (phase 2).....	8
6.3.1 Basic concept (phase 2-1).....	8
6.3.2 Basic plan (phase 2-2).....	8
6.3.3 Fundamental design (phase 2-3).....	9
6.3.4 Tendering (phase 2-4).....	10
6.3.5 Implementation design (phase 2-5).....	10
6.4 Construction and assessment (phase 3).....	11
6.4.1 Manufacturing, construction and installation (phase 3-1).....	11
6.4.2 Individual and combination tests and validation (phase 3-2).....	11
6.4.3 Overall assessment of smart community infrastructures as a whole (phase 3-3).....	12
6.5 Operation and maintenance (phase 4).....	13
6.6 Redevelopment and rehabilitation (phase 5).....	13
6.7 Decommissioning (phase 6).....	13
7 Interactions of smart community infrastructure	14
7.1 General.....	14
7.2 Interactions between infrastructures.....	14
7.3 Interactions between infrastructures and stakeholders.....	14
7.4 Interactions with external environment.....	14
8 General process for managing interactions and related opportunities and challenges	14
8.1 General.....	14
8.2 Process overview.....	14
8.3 Action items in “design of target infrastructures” phase (item 2 in Figure 12).....	15
8.3.1 Identification of interactions.....	15
8.3.2 Addressing interactions.....	15
8.3.3 Clarification of the responsibility for the opportunities and challenges.....	15
8.3.4 Action items in “construction and assessment” phase (item 3 in Figure 12).....	15
8.4 Validation of measures and countermeasures.....	15
9 Guidelines for managing interactions	16
9.1 General.....	16

9.2	Smart community concept (phase 1-1)	16
9.2.1	Recommendations for verification and validation	16
9.2.2	Responsibility	16
9.3	Basic concept (phase 2-1)	16
9.3.1	Recommendations for verification	16
9.3.2	Recommendations for validation	17
9.3.3	Responsibility	17
9.4	Basic plan (phase 2-2)	17
9.4.1	Recommendations for verification	17
9.4.2	Recommendations for validation	17
9.4.3	Responsibility	17
9.5	Fundamental design (phase 2-3)	17
9.5.1	Recommendations for verification	17
9.5.2	Recommendations for validation	18
9.5.3	Responsibility	18
9.6	Tendering (phase 2-4)	18
9.6.1	Recommendations for verification	18
9.6.2	Recommendations for validation	18
9.6.3	Responsibility	19
9.7	Implementation design (phase 2-5)	19
9.7.1	Recommendations for verification	19
9.7.2	Recommendations for validation	19
9.7.3	Responsibility	19
9.8	Manufacturing, construction and installation (phase 3-1)	20
9.8.1	Recommendations for verification	20
9.8.2	Recommendations for validation	20
9.8.3	Responsibility	20
9.9	Individual and combination tests and validation (phase 3-2)	20
9.9.1	Recommendations for verification	20
9.9.2	Recommendations for validation	20
9.9.3	Responsibility	20
9.10	Overall assessment and validation (phase 3-3)	21
9.10.1	Recommendations for verification	21
9.10.2	Recommendations for validation	21
9.10.3	Responsibility	21
9.11	Operation and maintenance (phase 4)	21
9.11.1	Recommendations for verification	21
9.11.2	Recommendations for validation	22
9.11.3	Responsibility	22
9.12	Redevelopment and rehabilitation (phase 5)	22
9.12.1	Recommendations for verification and validation	22
9.12.2	Responsibility	22
9.13	Decommissioning (phase 6)	22
9.13.1	Recommendations for verification	22
9.13.2	Recommendations for validation	23
9.13.3	Responsibility	23

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 268, *Sustainable cities and communities*, Subcommittee SC 1, *Smart community infrastructures*.

A list of all parts in the ISO 37155 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
