Foreword	v
Introduction	vi
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Understanding of smart community infrastructure layers	4
4.1 Smart community infrastructure system layer.....	4
4.2 Smart community infrastructure layer.....	4
4.3 Smart community sub-infrastructure layer.....	4
5 Benefits of applying this document	4
5.1 General.....	4
5.2 General benefits.....	5
5.3 Benefits for community authorities.....	5
5.4 Benefits for investors or lenders.....	5
5.5 Benefits for developers, operators and infrastructure owners.....	5
5.6 Benefits for service providers.....	6
5.7 Benefits for people in smart communities.....	6
6 Life cycle phases of smart community infrastructure	7
6.1 General.....	7
6.2 Initiation (phase 1).....	7
6.2.1 Smart community concept (phase 1-1).....	7
6.3 Design of target infrastructures (phase 2).....	8
6.3.1 Basic concept (phase 2-1).....	8
6.3.2 Basic plan (phase 2-2).....	9
6.3.3 Fundamental design (phase 2-3).....	10
6.3.4 Tendering (phase 2-4).....	10
6.3.5 Implementation design (phase 2-5).....	11
6.4 Construction and assessment (phase 3).....	11
6.4.1 Manufacturing, construction, and installation (phase 3-1).....	11
6.4.2 Individual and combination tests and validation (phase 3-2).....	11
6.4.3 Overall assessment of smart community infrastructures as a whole (phase 3-3).....	12
6.5 Operation and maintenance (phase 4).....	13
6.6 Redevelopment and rehabilitation (phase 5).....	13
6.7 Decommissioning (phase 6).....	14
7 General process to ensure consistency	14
7.1 General.....	14
7.2 Process overview.....	14
7.3 Action items in V process (item 2 in Figure).....	15
7.3.1 Item 1: Setting the targets for infrastructures.....	15
7.3.2 Item 2: Analyse the solutions for different infrastructures to achieve the targets.....	15
7.3.3 Item 3: Validation and Verification.....	15
7.3.4 Item 4: Monitoring the performance of infrastructures.....	15
7.3.5 Item 5: Improve the targets.....	15
8 Guidelines for ensuring consistency	15
8.1 General.....	15
8.2 Smart community concept (phase 1-1).....	15
8.2.1 Recommendations for verification and validation.....	15
8.2.2 Responsibility.....	16
8.3 Basic concept (phase 2-1).....	16

8.3.1	Recommendations for verification.....	16

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 268, *Sustainable cities and communities*, Subcommittee SC 1, *Smart community infrastructures*.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
