Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Fundamentals	1
4.1 Basic ideas and goals.....	1
4.2 Location and objectives of smart transportation for energy saving.....	2
4.2.1 General.....	2
4.2.2 Locations where smart transportation can be introduced.....	2
4.2.3 Objectives of introducing smart transportation.....	2
5 Targets of smart transportation for energy saving	3
5.1 General.....	3
5.2 Targets of smart transportation.....	4
5.2.1 Target transportation modes.....	4
5.2.2 Target technical and business contents of transportation.....	4
5.2.3 Target transportation services.....	6
6 Introduction of smart transportation for energy saving	9
6.1 Introduction of smart transportation.....	9
6.1.1 General.....	9
6.1.2 Services in the same transportation mode.....	9
6.1.3 Inter-modal services.....	9
6.1.4 Services involving interface between public and private transportation.....	10
6.2 Selection of energy-saving options.....	10
6.2.1 General.....	10
6.2.2 Energy-saving options.....	10
6.2.3 Criteria and parameters to be considered in the selection of energy-saving options.....	10
6.3 Adoption of energy-saving options.....	11
6.4 Conformation of the performance of smart transportation after introduction.....	11
6.4.1 General.....	11
6.4.2 Monitoring of smart transportation performance when applying more than one energy-saving option.....	11
7 Maintenance of the quality of smart transportation for energy saving	11
7.1 General.....	11
7.2 Parameters for comparing smart transportation performance.....	12
7.3 Modification of smart transportation.....	12
8 Long-term optimization of smart transportation for energy saving alongside generational and social changes	12
8.1 General.....	12
8.2 Optimization of smart transportation for current and future cities and city zones.....	12
8.3 Maintaining/discarding adopted energy-saving options.....	12
8.4 Reselection of energy-saving options.....	12
Annex A (informative) Typical energy-saving performance in railway operation by modifying speed profiles	13
Bibliography	15

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 268, *Sustainable cities and communities*, Subcommittee SC 1, *Smart community infrastructures*.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
