
Radiological protection — X and gamma reference radiation for calibrating dosimeters and doserate meters and for determining their response as a function of photon energy —

Part 4:

Calibration of area and personal dosimeters in low energy X reference radiation fields

Radioprotection — Rayonnements X et gamma de référence pour l'étalonnage des dosimètres et des débitmètres et pour la détermination de leur réponse en fonction de l'énergie des photons —

Partie 4: Étalonnage des dosimètres de zone et individuels dans des champs de référence X de faible énergie

Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Symbols (and abbreviated terms)	2
5 General procedures for calibrating and determining response	3
6 Characterisation and production of low energy X-ray reference radiations	3
6.1 General.....	3
6.2 Tube potential.....	4
6.3 Spectral fluence and conversion coefficients.....	4
7 Dosimetry of low energy reference radiations	4
7.1 General.....	4
7.2 Stability check facility.....	4
8 Calibration and determination of the response as a function of photon energy and angle of radiation incidence	4
8.1 General.....	4
8.2 Selection of calibration method.....	5
8.3 Calibration by using reference instruments for K_a	5
8.3.1 General.....	5
8.3.2 Conventional quantity value of the air kerma.....	5
8.3.3 Conventional quantity value of the dose equivalent quantities $H_p(0,07)$ and $H'(0,07)$	6
8.3.4 Conventional quantity value of the dose equivalent quantities $H_p(10)$ or $H^*(10)$ and $H_p(3)$ or $H'(3)$	6
8.3.5 Performing the calibration.....	8
8.4 Calibration by using reference instruments which measure the ICRU dose equivalent quantities.....	8
8.4.1 General.....	8
8.4.2 Conventional quantity value of the dose equivalent quantities $H_p(10)$ or $H^*(10)$ and $H_p(3)$ or $H'(3)$	9
8.4.3 Performing the calibration.....	10
8.5 Statement of uncertainty.....	11
Annex A (normative) Correction for air density	12
Bibliography	18

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 85, *Nuclear energy, nuclear technologies and radiological protection*, Subcommittee SC 2, *Radiological protection*.

This second edition cancels and replaces the first edition (ISO 4037-4:2004), which has been technically revised.

A list of all the parts in the ISO 4037 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
