

International  
Standard

**ISO 5222-3**

**Heat recovery ventilators and  
energy recovery ventilators —  
Testing and calculating methods for  
performance factor —**

**Part 3:  
Annual sensible heating and cooling  
recovery performance factors of  
heat recovery ventilators (HRVs)**

*Ventilateurs récupérateurs de chaleur et ventilateurs  
récupérateurs d'énergie — Méthodes d'essai et de calcul du  
facteur de performance —*

*Partie 3: Facteurs de performance annuelle de la récupération  
de chaleur et de refroidissement sensibles des ventilateurs  
récupérateurs de chaleur (HRVs)*

**First edition  
2026-01**

| <b>5 Tests</b>                                                                                                                | <b>2</b>  |
| 5.1 General requirements                                                                                                      | 2         |
| 5.2 Test conditions                                                                                                           | 2         |
| 5.3 Test methods                                                                                                              | 3         |
| 5.3.1 General                                                                                                                 | 3         |
| 5.3.2 Energy saving stage limit temperature                                                                                   | 3         |
| 5.3.3 Sensible heating and cooling recovery performance test                                                                  | 3         |
| 5.3.4 Determination of bypass outdoor temperature                                                                             | 3         |
| 5.3.5 Measurement of power input of heat recovery ventilator with bypass ventilation function                                 | 3         |
| 5.3.6 Measurement of power input of heat recovery ventilator with no bypass ventilation function                              | 3         |
| <b>6 Calculations</b>                                                                                                         | <b>3</b>  |
| 6.1 Gross sensible heating and cooling recovery effectiveness                                                                 | 3         |
| 6.2 Calculation of performance factor of annual sensible heating and cooling recovery ( $F_a$ )                               | 3         |
| 6.2.1 Characteristics of annual sensible recovery capacity against outdoor temperature                                        | 3         |
| 6.2.2 Power input characteristics of annual sensible heating and cooling recovery against outdoor temperature                 | 4         |
| 6.2.3 Outdoor temperature bin distribution for annual heating and cooling                                                     | 4         |
| 6.2.4 Calculation of annual sensible heating and cooling recovery capacity ( $E_a$ )                                          | 4         |
| 6.2.5 Calculation of annual sensible heating and cooling recovery power input ( $P_{in,E,a}$ )                                | 5         |
| 6.2.6 Calculation of performance factor for annual sensible heating and cooling recovery ( $F_a$ )                            | 5         |
| <b>7 Test report</b>                                                                                                          | <b>5</b>  |
| <b>Annex A (informative) The schematic diagram of HRVs' operation</b>                                                         | <b>7</b>  |
| <b>Annex B (informative) Default outdoor temperature bin distribution</b>                                                     | <b>10</b> |
| <b>Annex C (informative) Calculating method for annual performance factor when setting a specific application annual load</b> | <b>11</b> |
| <b>Annex D (informative) Report template</b>                                                                                  | <b>13</b> |
