

International
Standard

ISO 5349-3

**Mechanical vibration —
Measurement and evaluation
of human exposure to hand-
transmitted vibration —**

**Part 3:
Isolated and repeated shocks using
the frequency range of ISO 5349-1**

*Vibrations mécaniques — Mesurage et évaluation de l'exposition
des individus aux vibrations transmises à la main —*

*Partie 3: Évaluation de chocs isolés ou répétés en utilisant la
gamme de fréquences couverte par l'ISO 5349-1*

**First edition
2025-12**

Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Symbols and abbreviated terms	2
5 Hand-transmitted shock	3
6 Measurement and evaluation	4
6.1 Evaluation of continuous hand-transmitted vibration	4
6.2 Frequency range and frequency weightings	4
6.3 Evaluation of HTS	5
6.4 Measuring HTS	5
6.4.1 General	5
6.4.2 Location and orientation of transducers	5
6.4.3 Determining the instantaneous total values	5
6.4.4 Transducer coupling	6
6.4.5 Sampling	7
6.4.6 Measurement period	7
7 Application of HTS evaluations	8
7.1 Emission information	8
7.2 Health effects	8
8 Test report	8
Annex A (informative) Isolated and continuous hand-transmitted shock	9
Annex B (informative) Examples of VPM, p_F measured on common machine types	14
Annex C (informative) Supplementary measurement parameters	15
Bibliography	20

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents. ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 108, *Mechanical vibration, shock and condition monitoring*, Subcommittee SC 4, *Human exposure to mechanical vibration and shock*, in collaboration with the European Committee for Standardization (CEN) Technical Committee CEN/TC 231, *Mechanical vibration and shock*, in accordance with the Agreement on technical cooperation between ISO and CEN (Vienna Agreement).

A list of all parts in the ISO 5349 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
