
**Fire protection — Automatic sprinkler
systems —**

**Part 12:
Requirements and test methods for
grooved-end components for steel
pipe systems**

*Protection contre l'incendie — Systèmes d'extinction automatiques du
type sprinkler —*

*Partie 12: Exigences et méthodes d'essai pour les raccords de
tuyauterie en acier à extrémités rainurées*

Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms, definitions and abbreviated terms	1
3.1 Terms and definitions	1
3.2 Abbreviated terms	2
4 Product consistency	2
5 Product assembly	2
6 Requirements	3
6.1 Grooved-end dimensions	3
6.2 Minimum pipe wall thickness	3
6.3 Mechanical coupling housing	3
6.4 Pressure-responsive gasket	3
6.5 Bolts	3
6.6 Nuts	3
6.7 Hinge pins	3
6.8 Flexible coupling	3
6.9 Vacuum (see 7.2)	4
6.10 Air leakage (see 7.3)	4
6.11 Low-temperature exposure (see 7.4)	4
6.12 Heat aging (see 7.5)	4
6.13 Hydrostatic pressure (see 7.6)	4
6.14 Bending moment (see 7.7)	4
6.15 Gasket material evaluation	4
6.15.1 Compression set	4
6.15.2 Tensile strength and elongation	4
6.16 Fire resistance (see 7.8)	4
6.17 Rated working pressure	5
6.18 Nominal sizes	5
7 Test methods	5
7.1 Test conditions and assembly	5
7.1.1 Test conditions	5
7.1.2 Test assembly	5
7.2 Vacuum (see 6.9)	5
7.3 Air leakage (see 6.10)	6
7.4 Low-temperature exposure (see 6.11)	6
7.5 Heat aging (see 6.12)	6
7.6 Hydrostatic pressure test (see 6.13)	6
7.7 Bending moment (see 6.14)	7
7.7.1 Test method 1	7
7.7.2 Test method 2	8
7.8 Fire resistance (see 6.16)	10
8 Markings	11
8.1 Housing markings	11
8.2 Gasket markings	11
8.3 Manufacturer's installation instructions	12
Annex A (informative) Roll grooved dimensions and tolerances	13
Annex B (informative) Cut grooved dimensions and tolerances	18
Annex C (informative) Cast groove dimensions and tolerances	22

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 21, *Equipment for fire protection and fire fighting*, Subcommittee SC 5, *Fixed firefighting systems using water*.

This third edition cancels and replaces the second edition (ISO 6182-12:2014), which has been technically revised. The main changes compared to the previous edition are as follows:

— Updated tables on groove dimensions are included.

A list of all the parts in the ISO 6182 series, can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
