Foreword	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Classification related to the fastening	3
5 Requirements and test methods	4
5.1 General test conditions	4
5.1.1 Measurement uncertainties	4
5.1.2 Description and test load	4
5.1.3 Interfaces to the vehicle	4
5.1.4 Test samples and sequence	5
5.2 Lighting – Signalling	7
5.3 Rear license plate on vehicle	7
5.4 External projections	7
5.5 Materials	7
5.5.1 General material requirements	7
5.5.2 Corrosion resistance	8
5.5.3 Weather resistance	8
5.5.4 Cold resistance of plastic parts and attachment elements	9
5.5.5 Heat resistance of plastic parts	9
5.5.6 Functional safety of transport containers	9
5.6 Static load bearing capacity (vertical force F_z , longitudinal force F_x and lateral force F_y)	10
5.6.1 General requirements	10
5.6.2 Test setup for static tension tests	10
5.6.3 Test loads	10
5.6.4 Test implementation	11
5.7 Dynamic test	12
5.7.1 Load state during dynamic tests	12
5.7.2 General requirements	12
5.7.3 Test methods for “Belgian pavé”	12
5.7.4 Lane change test	13
5.7.5 Crash simulation test	13
5.7.6 Brake test	15
5.7.7 Resistance when driving over a speed bump (sleeping policeman)	15
5.8 Resistance of straps and mechanical fixing parts for attaching bicycles to the rear load carrier in respect to the elongation force F_s	16
5.8.1 Resistance of textile straps, belts, metallic straps	16
5.8.2 Resistance of other elements fixing load to the carrier (clamps, clips, etc.)	17
6 Product marking	18
6.1 Requirement	18
6.2 Testing	18
7 User information	18
7.1 Assembly instructions	18
7.2 User instructions	19
Annex A (normative) Test bicycle	20
Annex B (normative) Construction specification for “Belgian pavé” test rack	22
Annex C (informative) Types of rear load carriers	24
Annex D (informative) Rear license plate	28
Annex E (informative) Measurement of displacements	30
Annex F (informative) Classification of coupling balls for towing hitches	34

Annex G (informative) Typical test setup for the static and crash test	35
Bibliography	39

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents. ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 22, *Road vehicles*, Subcommittee SC 40, *Specific aspects for passenger cars, light and heavy commercial vehicles, special vehicles, buses and trailers/caravans*.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
