|-----------------------------------------------------------------------------------------|-----------|
| <b>Foreword</b>                                                                         | <b>v</b>  |
| <b>Introduction</b>                                                                     | <b>vi</b> |
| <b>1 Scope</b>                                                                          | <b>1</b>  |
| <b>2 Normative references</b>                                                           | <b>1</b>  |
| <b>3 Terms and definitions</b>                                                          | <b>1</b>  |
| <b>4 Principles of operation</b>                                                        | <b>2</b>  |
| 4.1 Ultrasonic array inspection                                                         | 2         |
| 4.2 Air-coupled ultrasonic testing                                                      | 3         |
| <b>5 Test equipment</b>                                                                 | <b>3</b>  |
| 5.1 Selection of test equipment and test configuration                                  | 3         |
| 5.2 Ultrasonic array system                                                             | 4         |
| 5.2.1 General                                                                           | 4         |
| 5.2.2 Ultrasonic array probe                                                            | 4         |
| 5.3 Ultrasonic system for air-coupled testing                                           | 5         |
| 5.3.1 General                                                                           | 5         |
| 5.3.2 Air-coupled ultrasonic probes                                                     | 5         |
| 5.4 Manipulator                                                                         | 5         |
| 5.5 Delay path                                                                          | 6         |
| <b>6 Reference blocks</b>                                                               | <b>6</b>  |
| <b>7 Preparation of the test object</b>                                                 | <b>7</b>  |
| 7.1 Cleaning                                                                            | 7         |
| 7.2 Visual inspection                                                                   | 7         |
| 7.3 Surface roughness                                                                   | 7         |
| <b>8 Test procedure</b>                                                                 | <b>7</b>  |
| 8.1 Determination of damping factor                                                     | 7         |
| 8.2 Determination of the sound velocity in the test object material                     | 7         |
| 8.3 Scanning                                                                            | 7         |
| 8.4 Recording                                                                           | 8         |
| 8.5 Signal processing                                                                   | 8         |
| <b>9 Configuring the test equipment</b>                                                 | <b>8</b>  |
| 9.1 Setting the zero point                                                              | 8         |
| 9.2 Alignment                                                                           | 9         |
| 9.3 Adjustment of sensitivity setting for ultrasonic array testing                      | 9         |
| 9.4 Adjustment of sensitivity setting for air-coupled ultrasonic testing                | 9         |
| 9.5 Periodic sensitivity check                                                          | 9         |
| <b>10 Testing</b>                                                                       | <b>10</b> |
| <b>11 Data analysis</b>                                                                 | <b>10</b> |
| 11.1 Image evaluation for ultrasonic array testing                                      | 10        |
| 11.2 Image evaluation for air-coupled ultrasonic testing                                | 10        |
| 11.3 Determination of discontinuity size                                                | 11        |
| 11.3.1 General                                                                          | 11        |
| 11.3.2 Determination of discontinuity size for ultrasonic array testing                 | 11        |
| 11.3.3 Determination of discontinuity sizes for air-coupled ultrasonic testing          | 12        |
| 11.3.4 Determination of signal-to-noise ratio ( $R_{SN}$ ) for ultrasonic array testing | 12        |
| 11.3.5 Determination of contrast for air-coupled ultrasonic testing                     | 12        |
| <b>12 Qualification of test personnel</b>                                               | <b>13</b> |
| <b>13 Test report</b>                                                                   | <b>13</b> |
| <b>Annex A (normative) Test report for ultrasonic array testing</b>                     | <b>14</b> |

|                                                                                      |           |
|--------------------------------------------------------------------------------------|-----------|
| <b>Annex B (normative) Test report sheet for air-coupled ultrasonic testing.....</b> | <b>16</b> |
|--------------------------------------------------------------------------------------|-----------|
