Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Introduction to the presentation of information	3
4.1 Presentation of information within the ISO 9241 series and their relationship	3
4.2 Modalities and media	4
4.3 Accessibility	5
4.4 Action guidance	5
4.5 Information presentation and aesthetics	5
5 Introduction to the principles for presentation of information	5
5.1 Overview	5
5.2 Relationship to other sets of principles in the ISO 9241-100 series	5
5.3 Relationship between individual principles	6
6 Principles and recommendations	6
6.1 Detectability	6
6.1.1 Principle of detectability	6
6.1.2 Guidance related to using prominence	6
6.1.3 Guidance related to timely presentation of information	7
6.1.4 Guidance related to making user-interface elements detectable by the user	8
6.1.5 Guidance related to using continuity to aid detectability	8
6.2 Discriminability	9
6.2.1 Principle of discriminability	9
6.2.2 Guidance related to the structuring of presented information	9
6.2.3 Guidance related to using presentation attributes	9
6.2.4 Guidance related to grouping using proximity	10
6.2.5 Guidance related to using similarity	10
6.3 Conciseness	11
6.3.1 Principle of conciseness	11
6.3.2 Guidance related to conciseness of content	11
6.3.3 Guidance related to conciseness of actions	11
6.4 Unambiguous interpretability	12
6.4.1 Principle of unambiguous interpretability	12
6.4.2 Guidance related to ensuring comprehensibility	12
6.4.3 Guidance related to ensuring unambiguous meaning	12
6.4.4 Guidance related to using closure	13
6.4.5 Guidance related to textual coherence	14
6.4.6 Guidance related to selection and use of modality and media	14
6.4.7 Guidance related to temporal appropriateness	14
6.4.8 Guidance related to user capabilities	14
6.5 Freedom from distraction	15
6.5.1 Principle of freedom from distraction	15
6.5.2 Guidance on avoiding and minimizing distractions	15
6.6 Consistency (internal and external)	16
6.6.1 Principle of consistency	16
6.6.2 Guidance related to consistency across items of information	16
6.6.3 Guidance related to logical consistency	17
6.6.4 Guidance related to consistency with conventions known to the user	17
Bibliography	18

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents. ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 159, *Ergonomics*, Subcommittee SC 4, *Ergonomics of human-system interaction*, in collaboration with the European Committee for Standardization (CEN) Technical Committee CEN/TC 122, *Ergonomics*, in accordance with the Agreement on technical cooperation between ISO and CEN (Vienna Agreement).

This second edition cancels and replaces the first edition (ISO 9241-112:2017), which has been technically revised.

The main changes are as follows:

- the terms and definitions have been updated;
- the guidance has been updated.

A list of all parts in the ISO 9241 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
