Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	2
4 Design and construction requirements	2
4.1 General	2
4.2 Inlet and expansion space chamber	5
4.3 Media chamber	5
4.4 Collection (underdrain) and back flushing unit	5
4.5 Prefiltration element	5
4.6 Back flushing control	6
4.6.1 Mandatory requirements	6
4.6.2 Optional features	6
5 Resistance of the filter to internal hydrostatic pressure	6
5.1 General	6
5.2 Preparation	7
5.3 Static pressure test	7
5.4 Cyclic pressure test	7
5.5 Collection (underdrain) and back flushing unit resistance to buckling or tearing	8
6 Clean pressure drop test	9
6.1 General	9
6.2 Flow rates and test sequence	9
6.3 Filter media	9
6.4 Prescreening	9
6.5 Inlet and outlet pressures	9
6.6 Test duration	9
6.7 Report	10
7 Back flushing tests	10
7.1 Back flushing parameters	10
7.2 Media escape test	10
8 Automatic back flushing and controller	11
8.1 Back flushing initiation	11
8.2 Flushing control mechanism test	11
8.2.1 Mechanism activated by pressure drop	11
8.2.2 Mechanism activated by duration of operation	11
8.2.3 Mechanism activated by volume of filtered water	11
8.2.4 Mechanism activated by another physical quantity	12
8.3 Operation of the protective device	12
9 Information to be supplied by the manufacturer	12
9.1 General	12
9.2 Filter data	13
9.3 Back flushing controller	13
Annex A (informative) Types of irrigation media filters	14
Annex B (informative) Granulated media	15

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 23, *Tractors and machinery for agriculture and forestry*, Subcommittee SC 18, *Irrigation and drainage equipment and systems*.

A list of all parts in the ISO 9912 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
