Foreword	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Significance and use	2
4.1 General.....	2
4.2 Comparing results from one machine.....	2
5 General principles for producing artifacts	2
5.1 General.....	2
5.2 Need to use feedstock conforming to a material specification.....	2
5.3 Need to undertake artifact building according to a documented process specification.....	2
5.4 File formats and preparation.....	3
5.5 Download files.....	3
5.6 Discussion of file conversion.....	3
5.7 AMF preferred (with conversion instructions/ resolutions).....	3
5.8 Need for test specification and test process.....	3
5.9 Quantity of test artifacts.....	3
5.10 Position and orientation of test artifacts.....	4
5.11 Considerations for orientation.....	4
5.12 Labelling.....	4
5.13 Coverage.....	4
5.14 Arrays.....	4
5.15 Part consolidation.....	4
5.16 Supports and post processing.....	5
6 General principles for measuring artifacts	5
6.1 General.....	5
6.2 Measure parts as built.....	5
6.3 Measurement strategy.....	5
6.4 Measurement uncertainty.....	6
7 Artifact geometries	6
7.1 General.....	6
7.2 Accuracy.....	6
7.2.1 Linear artifact.....	6
7.2.2 Circular artifact.....	8
7.3 Resolution.....	10
7.3.1 Resolution pins.....	10
7.3.2 Resolution holes.....	11
7.3.3 Resolution rib.....	13
7.3.4 Resolution slot.....	15
7.4 Surface texture.....	17
7.4.1 Purpose.....	17
7.4.2 Geometry.....	17
7.4.3 Measurement.....	18
7.4.4 Reporting.....	19
7.4.5 Considerations.....	19
7.5 Labelling.....	20
7.5.1 Purpose.....	20
7.5.2 Geometry.....	20
7.5.3 Considerations.....	21
Annex A (informative) Example artifact configurations	22
Annex B (informative) Measurement techniques	25

Annex C (informative) Measurement procedures	28
Annex D (informative) List of specimen names and sizes	34
Bibliography	36

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see www.iso.org/iso/foreword.html.

This document was prepared by ISO/TC 261, *Additive manufacturing*, in cooperation with ASTM Committee F42, *Additive Manufacturing Technologies*, on the basis of a partnership agreement between ISO and ASTM International with the aim to create a common set of ISO/ASTM standards on additive manufacturing.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
