Foreword 5

Introduction 12

1 Scope 14

2 Normative references 14

3 Terms and definitions 14

4 Overview of hydrogen applications 27

5 Basic properties of hydrogen 31

6 Safety considerations for the use of gaseous and liquid hydrogen 37

7 Mitigation and control of hazards and risks 43

Annex A (informative) Hydrogen properties 68

Annex B (informative) Hydrogen combustion data 75

Annex C (informative) Material data 82

Annex D (informative) Other storage options 88

Bibliography 1

Foreword vi

Introduction vii

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Overview of hydrogen applications 14

4.1 Basic hydrogen infrastructure 14

4.1.1 Categories of infrastructure 14

4.1.2 Production 15

4.1.3 Storage and transport 15

4.1.4 Hydrogen use applications 16

4.2 Typical hydrogen system components 16

4.2.1 General 16

4.2.2 Storage vessels 17

4.2.3 Fluid delivery lines, piping, joints, and seals 17

4.2.4 Flow controls 17

4.2.5 Pressure-relief systems 17

4.2.6 Detection components 17

4.2.7 Other components 18

4.2.8 Considerations for conditions external to the system 18

4.3 Hydrogen fuel 18

4.4 Environmental effects 18

5 Basic properties of hydrogen 19

5.1 General properties 19

5.1.1 Atomic and molecular properties 19

5.1.2 Appearance and general characteristics 19

5.2	Selected thermophysical properties	19
5.2.1	General	19
5.2.2	Selected thermophysical properties of gaseous hydrogen	19
5.2.3	Selected thermophysical properties of cryogenic liquid hydrogen	20
5.3	Basic combustion properties	21
5.3.1	General remark on safety characteristics	21
5.3.2	Selected combustion properties of hydrogen	21
5.3.3	Explosions	21
5.3.4	Deflagration	22
5.3.5	Detonation	22
5.3.6	Flammability limits	23
5.3.7	Ignition energy and minimum ignition energy as applied to deflagration	24
6	Safety considerations for the use of gaseous and liquid hydrogen	24
6.1	General	24
6.2	Hazards involved as a consequence of the properties of hydrogen	25
6.2.1	General	25
6.2.2	Gaseous hydrogen	25
6.2.3	Liquid hydrogen	26
6.3	Factors involved in combustion hazards	26
6.3.1	Aspects of combustion	26
6.3.2	Non-premixed combustion processes	27
6.3.3	Explosions	27
6.4	Factors involved in pressure hazards	28
6.4.1	General	28
6.4.2	Gaseous storage	29
6.4.3	Liquid hydrogen	29
6.5	Factors involved in low temperature hazards	29
6.6	Factors involved in hydrogen embrittlement hazards	29
6.6.1	Hydrogen embrittlement	29
6.6.2	Hydrogen attack	29
6.7	Health hazards	30
6.7.1	Cold burns	30
6.7.2	High temperature burns	30
6.7.3	Asphyxiation	30
6.8	Team approach and education/training needed for the safe use of hydrogen	30
7	Mitigation and control of hazards and risks	30
7.1	General mitigation and control of hazards and risk	30
7.1.1	General	30
7.1.2	Lessons learned from past experience	31
7.1.3	Addressing hazards	31
7.1.4	Minimizing the severity of the consequences of hazards	32
7.2	Mitigation of design hazards and risks	33
7.2.1	Inherently safer design	33
7.2.2	Considerations in the selection of suitable construction material	33
7.2.3	Considerations for vessels and components	34
7.2.4	Prevention of overpressure	35
7.2.5	Considerations for piping, joints, and connections	35
7.2.6	Cleaning considerations	36
7.2.7	Component considerations	36
7.3	Prevention and mitigation of fire and explosion hazards and risks	37
7.3.1	General	37
7.3.2	Prevention of unwanted hydrogen/oxidizer mixtures	38

7.3.3	Ignition	38
7.3.4	Deflagration and detonation	40
7.3.5	Oxygen enrichment	40
7.4	Detection considerations	40
7.4.1	Hydrogen release detection	40
7.4.2	Fire detection	41
7.5	Considerations for facilities	42
7.5.1	General	42
7.5.2	Locations	42
7.5.3	Exclusion areas	42
7.5.4	Protecting barricades	43
7.5.5	Safety control equipment	43
7.5.6	Disposal of hydrogen	44
7.5.7	Buildings	44
7.5.8	Ventilation	45
7.5.9	Electrical components	45
7.5.10	Alarms and warning devices	46
7.5.11	Fire protection and fire fighting	46
7.6	Considerations for operations	47
7.6.1	General	47
7.6.2	Operating procedures	47
7.6.3	Personal protective equipment	47
7.6.4	Cool-down	48
7.6.5	Transportation	49
7.6.6	Storage and transfer operations	49
7.6.7	Safety procedures	49
7.7	Recommended practices for organizations	51
7.7.1	General	51
7.7.2	Control through organizational policies and procedures	51
7.7.3	Use of approved procedures and checklists	51
7.7.4	Conduct appropriate reviews	52
7.7.5	Approved maintenance and quality control programmes	52
7.7.6	Personnel education/training	52
7.7.7	Hazard and operability assessment	52
Annex A (informative)	Hydrogen properties	53
A.1	General	53
A.2	Comparison with other common gases	56
A.3	Comparison with other liquefied gases	56
Annex B (informative)	Hydrogen combustion data	57
B.1	Safety-related combustion properties	57
B.2	Detonation cell widths for hydrogen/air mixtures	58
B.3	Comparison of hydrogen with other common fuels	59
Annex C (informative)	Material data	60
C.1	Material selection criteria	60
C.2	Hydrogen embrittlement	61
C.3	Low temperature effects on metals	62
C.4	Basic safety considerations for chemical compounds	63
C.5	Evaluation of Materials for Hydrogen Service	64
