Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 General requirements for protectors 4

4.1 General 4

4.2 Ambient temperature 4

4.3 Replacement of components 4

4.4 Robustness 4

4.4.1 Principle 4

4.4.2 Testing 5

4.4.3 Failure criteria 5

4.5 Cleaning 5

4.6 Product disinfection for re-usable protectors 6

4.6.1 Principle 6

4.6.2 UV-C disinfection 6

4.6.3 Disinfection by other means 6

4.6.4 Testing 6

5 Physical optical properties for protectors 7

5.1 Transmittance 7

5.1.1 Lenses without deliberate filtering action 7

5.1.2 Luminous transmittance of lenses without deliberate filtering action 7

5.1.3 Assessment of colour 7

5.2	Sunglare filters	7
5.2.1	General	7
5.2.2	Luminous and spectral transmittance and scale numbers	7
5.2.3	Marking of sunglare filters.....	8
6	Physical and mechanical requirements for protectors	8
6.1	Area to be protected	8
6.1.1	Area to be protected: Level I.....	9
6.1.2	Area to be protected: Level II and Level II+	10
6.2	Protection against spurt and spray.....	11
6.3	Protection from aerosols (optional).....	12
6.3.1	General	12
6.3.2	Aerosol Protection for Level I Area to be protected	12
6.3.3	Aerosol protection for Level II or II+ Area to be protected	12
7	Spurt and spray test.....	12
7.1	Principle.....	12
7.2	Reagents, materials and apparatus.....	12
7.2.1	Headform.....	12
7.2.2	Volumetric flask.....	12
7.2.3	Magnetic stirrer.....	12
7.2.4	Biofluid simulant	12
7.2.5	Spray and spurt generator	13
7.3	Procedure	13
7.3.1	Calibration of test apparatus.....	13
7.3.2	Checking during use	15
7.3.3	Cleaning.....	15
7.3.4	Test procedure	15
7.4	Test report	15
8	Marking of eye protectors and packaging	16
8.1	General	16
8.2	Mandatory markings on lenses	16
8.3	Mandatory markings on frames.....	16
9	Information to be supplied by the manufacturer	17
Annex A (informative)	Guidance for the selection, use, maintenance and disposal of eye protection for biological hazards.....	18
Annex ZA (informative)	Relationship between this European Standard and the essential requirements of Regulation 2016/425 aimed to be covered	29

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents. ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 94, *Personal safety — Personal protective equipment*, Subcommittee SC 6, *Eye and face protection*, in collaboration with the European Committee for Standardization (CEN) Technical Committee CEN/TC 85, *Eye-protective equipment*, in accordance with the Agreement on technical cooperation between ISO and CEN (Vienna Agreement).

~~This document was prepared by Technical Committee ISO/TC 94.~~

~~A list of all parts in the ISO 16321 series can be found on the ISO website.~~

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
