## Foreword

Formatted: Adjust space between Latin and Asian text, Adjust space between Asian text and numbers

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see [www.iso.org/directives](http://www.iso.org/directives)).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at [www.iso.org/patents](http://www.iso.org/patents). ISO shall not be held responsible for identifying any or all such patent rights.

This fourth edition cancels and replaces the third edition (ISO 22300:2021), which has been technically revised.

Formatted: Adjust space between Latin and Asian text, Adjust space between Asian text and numbers

The main changes are as follows:

Formatted: Default Paragraph Font

Formatted: Default Paragraph Font

Formatted: Default Paragraph Font

- removal of terms that are not commonly used across the portfolio of ISO/TC 292 standards and are very specific to particular standards;
- definitions for some terms have been modified to be more generic and applicable across the portfolio of ISO/TC 292 standards;
- inclusion of new terms and definitions from recent published documents and documents transferred to ISO/TC 292;
- the structure of the document has been revised to make the document more concise and user friendly.

## Introduction

This document defines generic terms related to security and resilience topics.

This document provides a common language profile to help facilitate a common understanding and to maintain consistency of fundamental terminology.

Security and resilience topics cover a broad range of disciplines. In some circumstances, it can be necessary to supplement the vocabulary in this document.

This document can be applied as a reference by competent authorities, as well as by specialists involved in standardization systems, to better and more accurately understand relevant text, correspondences and communications.
