

FINAL DRAFT

International Standard

ISO/FDIS 8347

Measurement procedures associated with the chain of custody in native tropical forest management areas

*Procédures de mesure associées à la chaîne de contrôle dans les
zones de gestion des forêts tropicales indigènes*

ISO/TC 287

Secretariat: **ABNT**

Voting begins on:
2025-09-02

Voting terminates on:
2025-10-28

RECIPIENTS OF THIS DRAFT ARE INVITED TO SUBMIT, WITH THEIR COMMENTS, NOTIFICATION OF ANY RELEVANT PATENT RIGHTS OF WHICH THEY ARE AWARE AND TO PROVIDE SUPPORTING DOCUMENTATION.

IN ADDITION TO THEIR EVALUATION AS BEING ACCEPTABLE FOR INDUSTRIAL, TECHNOLOGICAL, COMMERCIAL AND USER PURPOSES, DRAFT INTERNATIONAL STANDARDS MAY ON OCCASION HAVE TO BE CONSIDERED IN THE LIGHT OF THEIR POTENTIAL TO BECOME STANDARDS TO WHICH REFERENCE MAY BE MADE IN NATIONAL REGULATIONS.

Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	2
3 Terms and definitions	2
3.1 Terms related to the forest value chain	2
3.2 Terms related to remote sensing technology	5
3.3 Terms related to the accuracy of remote sensing technology	6
4 Forest management documentation and relevant data required from the responsible party	7
4.1 Understanding of the native forest area	7
4.1.1 Criterion: wood production capacity	7
4.2 Following an approved forest management plan	7
4.2.1 Principle	7
4.2.2 Criterion: harvesting permit	7
4.2.3 Criterion: geospatial documentation related to the forest management plan	8
4.2.4 Criterion: geospatial documentation related to the actual activities	8
4.3 Chain of custody traceability	9
4.3.1 Principle	9
4.3.2 Criterion: chain of custody records	9
5 Information sources and technologies – Independent georeferenced information derived from remote sensing (and its accuracy requirements)	10
5.1 Consistency checking of the remote sensing technologies availability in the geospatial industry	10
5.1.1 Principle	10
5.1.2 Criteria	10
5.2 Consistency checking of the remote sensing technologies detection's relevant capacity	11
5.2.1 Principle	11
5.2.2 Criteria	11
6 Consistency checking procedures	11
6.1 General	11
6.2 Consistency of georeferenced data provided by the responsible party	12
6.2.1 Principle	12
6.2.2 Criteria	12
6.3 Consistency of the production area's spatial pattern	12
6.3.1 Principle	12
6.3.2 Criteria	13
7 Claims	13
8 Requirements for whistleblowing	13
Bibliography	14

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives-and-policies.html).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents. ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 287, *Sustainable processes for wood and wood-based products*.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
