Introductionxiv

1 Scope..... 1

2 Normative references 1

3 Terms and definitions 1

4 Symbols..... 2

5 General..... 5

6 Internal pressure tests for fluid channels (liquid heating collectors only) 9

7 Air leakage rate test (air heating collectors only) 10

8 Standard stagnation temperature..... 11

9 Exposure and half-exposure test..... 13

10 External thermal shock test..... 16

11 Internal thermal shock test (liquid heating collectors only)..... 16

12 Rain penetration test 17

13 Freeze resistance test 21

14 Mechanical load test with positive or negative pressure 22

15 Impact resistance test..... 24

16 Active self-protection mechanisms..... 26

17 Final inspection..... 27

18 Thermal performance testing 29

19 Collector mounting and location 29

20 Instrumentation 30

21 Test installation..... 34

22 Thermal performance test procedures 39

23 Computation of the collector parameters..... 52

24 Determination of the effective thermal capacity and the time constant 55

25 Determination of the incidence angle modifier (IAM) 58

26 Determination of the pressure drop 63

Annex A (normative) Test reports 67

Annex B (normative) Solar collector performance rating 87

Annex C (normative) Determination of the diffuse incidence angle modifier K_d 89

Annex D (normative) Density and heat capacity of water..... 91

Annex E (informative) Assessment of the standard uncertainty in solar collector testing 92

Annex F (informative) Measurement of the velocity weighted mean temperature 97

Annex G (normative) Material efficiency aspects..... 99

Annex H (normative) Area conversion of the main performance parameters..... 100

Annex I (informative) Validation of collector parameters	101
Bibliography	106

Foreword	xi
Introduction	xiii
1 — Scope	1
2 — Normative references	1
3 — Terms and definitions	1
3.1 Air-brine collector	2
3.2 Gross Yield	2
4 — Symbols	2
5 — General	5
5.1 Test overview — Sequence of the tests	5
5.2 Design operating range	6
5.3 Testing of collectors with specific attributes	7
5.3.1 General	7
5.3.2 Collectors using external power sources for regular operation	7
5.3.3 Collectors with active self-protection	7
5.3.4 Collectors co-generating thermal and electrical power	8
5.3.5 Tracking collectors	8
5.3.6 Air and liquid heating collectors	8
6 — Internal pressure tests for fluid channels (liquid heating collectors only)	9
6.1 Objective	9
6.2 Fluid channels made of non-polymeric materials	9
6.2.1 Apparatus and procedure	9
6.2.2 Test conditions	9
6.3 Fluid channels made of polymeric materials	9
6.3.1 Apparatus and procedure	9
6.3.2 Test conditions	10
6.4 Results and reporting	10
7 — Air leakage rate test (air heating collectors only)	10
7.1 Objective	10
7.2 Apparatus and procedure	10
7.3 Test conditions	10
7.4 Results and reporting	11
8 — Standard stagnation temperature	11
8.1 Objective	11
8.2 Testing under stagnation conditions	11
8.3 Measurement and extrapolation of the standard stagnation temperature	12
8.4 Determining standard stagnation temperature using efficiency parameters	12
8.5 Results and reporting	12
9 — Exposure and half-exposure test	13
9.1 Objective	13
9.2 Initial outdoor exposure	13
9.3 Method 1 (Outdoor exposure)	13
9.4 Method 2 (Heat transfer loop)	13
9.5 Method 3 (Indoor exposure)	14
9.6 Exposure test for collectors using active mechanism to protect against overheating	14

9.7 Test conditions 14

9.8 Results and reporting 15

10 External thermal shock test 15

10.1 Objective 15

10.2 Apparatus and procedure 15

10.3 Test conditions 15

10.4 Results and reporting 15

11 Internal thermal shock test (liquid heating collectors only) 15

11.1 Objective 15

11.2 Apparatus and procedure 15

11.3 Test conditions 16

11.4 Results and reporting 16

12 Rain penetration test 16

12.1 Objective 16

12.2 Apparatus and procedure 16

12.3 Test conditions 16

12.4 Results and reporting 18

13 Freeze resistance test 18

13.1 Objective 18

13.2 Freeze resistant collectors 18

13.2.1 General 18

13.2.2 Test conditions 19

13.2.3 Results and reporting 19

13.3 Heat pipe collectors 19

13.3.1 General 19

13.3.2 Test conditions 19

13.3.3 Results and reporting 20

14 Mechanical load test with positive or negative pressure 20

14.1 Objective 20

14.2 Apparatus and procedure 20

14.2.1 Mounting 20

14.2.2 Methods for the application of the loads 20

14.2.3 Particular specifications for tracking collectors or other specific collector types 21

14.3 Test conditions 21

14.4 Results and reporting 21

15 Impact resistance test 21

15.1 Objective 21

15.2 Test procedure 21

15.3 Impact location 22

15.4 Method 1: Impact resistance test using ice balls 22

15.4.1 Apparatus 22

15.4.2 Ice balls 22

15.4.3 Specific aspects of the test procedure using ice balls 22

15.5 Method 2: Impact resistance test using steel balls 23

15.6 Results and reporting 23

16 Active self-protection mechanisms 23

16.1 Objective 23

16.2 Apparatus and procedure 23

16.3 Test conditions 24

16.3.1 Loss of power test 24

16.3.2 Loss of communication test 24

16.3.3 Overheating protection test	24
16.3.4 Adverse climatic conditions protection test	24
16.4 Results and reporting	24
17 Final inspection	24
17.1 Objective	24
17.2 Test procedure	25
17.3 Results and reporting	25
18 Thermal performance testing	26
18.1 General	26
19 Collector mounting and location	26
19.1 General	26
19.2 Shading from direct solar irradiance	27
19.3 Diffuse and reflected solar irradiance	27
19.4 Thermal irradiance	27
20 Instrumentation	27
20.1 Solar radiation measurement	27
20.1.1 Pyranometer	27
20.2 Thermal radiation measurement	28
20.3 Temperature measurements	28
20.3.1 Heat transfer fluid temperatures (liquid heating collectors)	28
20.3.2 Volume flow weighted mean temperature $\theta_{m,th}$ (air heating collectors)	28
20.3.3 Measurement of ambient air temperature	29
20.4 Flow rate measurement	29
20.4.1 Measurement of mass flow rate (liquid)	29
20.4.2 Measurement of collector fluid flow rate (air heating collectors)	30
20.5 Measurement of air speed over the collector	30
20.5.1 General	30
20.5.2 Required accuracy	30
20.5.3 Mounting of sensors for the measurement of air velocity over the collector	30
20.6 Elapsed time measurement	31
20.7 Humidity ratio (air collectors)	31
20.8 Collector dimensions	31
21 Test installation	31
21.1 Liquid heating collectors	31
21.1.1 General	31
21.1.2 Heat transfer fluid	32
21.1.3 Pipe work and fittings	32
21.2 Air heating collectors	32
21.2.1 General	32
21.2.2 Closed loop test circuit	33
21.2.3 Open to ambient test circuit	33
21.2.4 Heat transfer fluid	34
21.2.5 Pump and flow control devices	34
21.2.6 Air ducts	34
21.2.7 Fan and flow control devices	34
21.2.8 Air preconditioning apparatus	34
21.2.9 Humidity ratio	35
22 Thermal performance test procedures	35
22.1 General	35
22.2 Preconditioning of the collector	35
22.3 Test conditions	36

22.3.1 General.....	36
22.3.2 Flow rates.....	36
22.3.3 Air speed parallel to the collector plane.....	36
22.4 Test procedure.....	36
22.4.1 General.....	36
22.4.2 Steady-state method.....	37
22.4.3 Quasi-dynamic testing.....	37
22.5 Measurements.....	37
22.5.1 General.....	37
22.5.2 Data acquisition requirements.....	38
22.6 Test period.....	38
22.6.1 Steady-state testing.....	38
22.6.2 Quasi-dynamic testing.....	39
22.7 Performance test using a solar irradiance simulator.....	42
22.7.1 General.....	42
22.7.2 Solar irradiance simulator for thermal performance testing.....	42
22.7.3 Additional measurements during tests in solar irradiance simulators.....	43
22.7.4 Solar irradiance simulator for the measurement of incidence angle modifiers.....	43
23 Computation of the collector parameters.....	44
23.1 Liquid heating collectors.....	44
23.1.1 General.....	44
23.1.2 Steady-state test method for liquid heating collectors.....	44
23.1.3 Quasi-dynamic test method for liquid heating collectors.....	44
23.1.4 Data analysis.....	44
23.2 Air heating collectors.....	45
23.2.1 General.....	45
23.2.2 Steady-state test method for closed loop air heating collectors.....	45
23.2.3 Steady-state test method for open to ambient air heating collectors.....	45
23.3 Standard reporting conditions (SRC).....	45
23.4 Standard uncertainties.....	46
23.5 Reference area conversion.....	46
24 Determination of the effective thermal capacity and the time constant.....	46
24.1 General.....	46
24.2 Measurement of the effective thermal capacity with irradiance.....	47
24.3 Measurement of the effective thermal capacity using the quasi-dynamic method.....	47
24.4 Calculation method for the determination of the effective thermal capacity.....	47
24.5 Determination of collector time constant.....	48
25 Determination of the incidence angle modifier (IAM).....	49
25.1 General.....	49
25.2 Modelling.....	49
25.2.1 General.....	49
25.2.2 Steady-state method.....	51
25.2.3 Quasi-dynamic method.....	51
25.3 Test procedures.....	51
25.3.1 Steady-state liquid heating collectors.....	51
25.4 Calculation of the collector incidence angle modifier.....	52
25.5 Reporting.....	52
26 Determination of the pressure drop.....	52
26.1 General.....	52
26.2 Liquid heating collectors.....	53
26.2.1 Apparatus and procedure.....	53
26.2.2 Pressure drop caused by fittings.....	53
