About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigenda or an amendment might have been published.

IEC Catalogue - webstore.iec.ch/catalogue

The stand-alone application for consulting the entire bibliographical information on IEC International Standards, Technical Specifications, Technical Reports and other documents. Available for PC, Mac OS, Android Tablets and iPad.

IEC publications search - www.iec.ch/searchpub

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee,...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and also once a month by email.

Electropedia - www.electropedia.org

The world's leading online dictionary of electronic and electrical terms containing 20 000 terms and definitions in English and French, with equivalent terms in 16 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

IEC Glossary - std.iec.ch/glossary

65 000 electrotechnical terminology entries in English and French extracted from the Terms and Definitions clause of IEC publications issued since 2002. Some entries have been collected from earlier publications of IEC TC 37, 77, 86 and CISPR.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: csc@iec.ch.

CONTENTS

FOREWORD.....	6
INTRODUCTION.....	8
1 Scope.....	10
2 Normative references	10
3 Terms, definitions and abbreviated terms	11
3.1 Terms and definitions.....	11
3.2 Abbreviated terms.....	13
4 Conformance.....	13
5 Structure of the generic cabling system	14
5.1 General.....	14
5.2 Functional elements.....	14
5.3 General structure and hierarchy.....	14
5.4 Cabling subsystems.....	16
5.4.1 General	16
5.4.2 Network access cabling subsystem.....	16
5.4.3 Main distribution cabling subsystem.....	16
5.4.4 Intermediate distribution cabling subsystem.....	16
5.4.5 Zone distribution cabling subsystem	16
5.4.6 Design objectives	17
5.5 Accommodation of functional elements	17
5.6 Interfaces.....	17
5.6.1 Equipment interfaces and test interfaces	17
5.6.2 Channels and links	18
5.7 Dimensioning and configuring	19
5.7.1 Distributors	19
5.7.2 Redundancy	20
5.7.3 External network interface	21
5.7.4 Cables	22
5.7.5 Equipment cords.....	22
5.7.6 Patch cords and jumpers	22
5.7.7 Equipment outlets.....	22
5.7.8 LDP	23
5.7.9 Building entrance facilities	23
5.8 Earthing and equipotential bonding.....	23
6 Channel performance requirements	23
6.1 General.....	23
6.2 Environmental performance	25
6.3 Transmission performance	25
6.3.1 General	25
6.3.2 Balanced cabling	25
6.3.3 Optical fibre cabling.....	25
7 Link performance requirements	26
7.1 General.....	26
7.2 Balanced cabling	26
7.3 Optical fibre cabling	26
8 Reference implementations	26

8.1	General.....	26
8.2	Balanced cabling	26
8.2.1	Assumptions.....	26
8.2.2	Zone distribution cabling.....	27
8.2.3	Cabling between distributors.....	30
8.2.4	Network access cabling	33
8.3	Optical fibre cabling	35
8.3.1	General	35
8.3.2	Component choice	35
8.3.3	Dimensions.....	36
9	Cable requirements	36
9.1	General.....	36
9.2	Balanced cables	36
9.3	Optical fibre cables	36
10	Connecting hardware requirements	36
10.1	General requirements	36
10.1.1	Overview	36
10.1.2	Location	36
10.1.3	Design.....	37
10.1.4	Operating environment.....	37
10.1.5	Mounting	37
10.1.6	Installation practices.....	37
10.1.7	Marking and colour coding.....	37
10.2	Connecting hardware for balanced cabling.....	37
10.2.1	General requirements.....	37
10.2.2	Performance marking.....	37
10.2.3	Mechanical characteristics.....	37
10.3	Connecting hardware for optical fibre cabling.....	38
10.3.1	General requirements	38
10.3.2	ENI requirements.....	38
10.3.3	EO requirements	38
10.3.4	Optical fibre assignments at the EO.....	39
10.3.5	Other connecting hardware.....	39
11	Requirements for cords and jumpers	39
11.1	Jumpers.....	39
11.2	Balanced cords	39
11.3	Optical fibre cords.....	39
Annex A	(normative) Combination of balanced cabling links.....	40
A.1	General.....	40
A.2	Requirements	40
Annex B	(informative) Usage of high density connecting hardware within optical fibre cabling.....	41
B.1	General.....	41
B.2	Use cases for high density connecting hardware.....	41
Annex C	(informative) Examples of structures in accordance with ISO/IEC 11801-5	45
C.1	General.....	45
C.2	Data centre minimum configuration	46
C.3	End of Row concept.....	47

C.4	Middle of Row concept	48
C.5	Top of Rack concept	49
C.6	End of Row and Middle of Row concept with redundancy	50
C.7	Top of Rack concept with redundancy	51
C.8	End of Row concept with full redundancy	52
C.9	Top of Rack concept with redundancy	53
Annex D (informative)	Examples of networking architectures	54
D.1	General	54
D.2	Data centre fabric fat-tree	54
D.3	Data centre fabric full-mesh	55
D.4	Data centre fabric interconnected meshes	55
D.5	Data centre fabric centralized switch	56
D.6	Data centre fabric virtual switch	57
Bibliography		58

Figure 1 – Relationships between the generic cabling documents produced by ISO/IEC JTC 1/SC 25	8
Figure 2 – Structure of generic cabling within a data centre	15
Figure 3 – Hierarchical structure of generic cabling within a data centre	15
Figure 4 – Example of accommodation of functional elements	17
Figure 5 – Test and equipment interfaces	19
Figure 6 – Connection of functional elements providing redundancy	21
Figure 7 – Examples of external service cabling connections to the ENI	22
Figure 8 – Example of a channel with four connections	24
Figure 9 – Example of a system showing the location of cabling interfaces	25
Figure 10 – Zone distribution cabling models	28
Figure 11 – Cabling model between distributors using Class E _A to F _A	31
Figure 12 – Cabling model between distributors using Class I and II	31
Figure 13 – Network access cabling models	34
Figure A.1 – Examples of combination of different links	40
Figure B.1 – Examples of high density connecting hardware within main distribution cabling and intermediate distribution cabling	42
Figure B.2 – Examples of high density connecting hardware at the LDP and EO within zone distribution cabling	44
Figure C.1 – Key for Figures C.2 through C.9	45
Figure C.2 – Example of a minimum configuration	46
Figure C.3 – Example of End of Row configuration	47
Figure C.4 – Example of Middle of Row configuration	48
Figure C.5 – Example of Top of Rack configuration	49
Figure C.6 – Example of End of Row configuration with redundancy	50
Figure C.7 – Example of Top of Rack configuration with redundancy	51
Figure C.8 – Example of End of Row configuration with full redundancy	52
Figure C.9 – Example of Top of Rack configuration with full redundancy	53
Figure D.1 – Fat-tree example	54
Figure D.2 – Full-mesh example	55

Figure D.3 – Interconnected mesh example	56
Figure D.4 – Centralized switch example	56
Figure D.5 – Virtual switch example	57
Table 1 – Zone distribution cabling – length assumptions for balanced cabling using Classes E _A to F _A	29
Table 2 – Zone distribution cabling – length assumptions for balanced cabling using Classes I and II	30
Table 3 – Zone distribution channel length equations for Classes	30
Table 4 – Cabling between distributors – length assumptions for balanced cabling using Classes E _A to F _A	31
Table 5 – Cabling between distributors – length assumptions for balanced cabling using Classes I and II	32
Table 6 – Length equations for cabling between distributors	32
Table 7 – Network access cabling channel equations	35
Table 8 – Connecting hardware of the type used at the EO	37
