About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigenda or an amendment might have been published.

IEC Catalogue - webstore.iec.ch/catalogue

The stand-alone application for consulting the entire bibliographical information on IEC International Standards, Technical Specifications, Technical Reports and other documents. Available for PC, Mac OS, Android Tablets and iPad.

IEC publications search - www.iec.ch/searchpub

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee,...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and also once a month by email.

Electropedia - www.electropedia.org

The world's leading online dictionary of electronic and electrical terms containing 20 000 terms and definitions in English and French, with equivalent terms in 16 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

IEC Glossary - std.iec.ch/glossary

65 000 electrotechnical terminology entries in English and French extracted from the Terms and Definitions clause of IEC publications issued since 2002. Some entries have been collected from earlier publications of IEC TC 37, 77, 86 and CISPR.

IEC Customer Service Centre - webstore.iec.ch/csc

CONTENTS

FOREWORD.....	5
INTRODUCTION.....	6
1 Scope.....	9
2 Normative references	9
3 Terms, definitions and abbreviated terms	10
3.1 Terms and definitions.....	10
3.2 Abbreviated terms.....	11
4 Conformance.....	11
5 Structure of the generic cabling system	12
5.1 General.....	12
5.2 Functional elements.....	12
5.2.1 Stand-alone structure	12
5.2.2 Overlay structure	13
5.3 General structure and hierarchy.....	13
5.3.1 Type A generic cabling	13
5.3.2 Type B generic cabling	14
5.4 Cabling subsystems.....	15
5.4.1 Campus and building backbone cabling subsystem.....	15
5.4.2 Service distribution cabling subsystem (Type A generic cabling).....	15
5.4.3 Service distribution cabling subsystem (Type B generic cabling).....	15
5.4.4 Design objectives	16
5.5 Accommodation of functional elements	16
5.5.1 General	16
5.5.2 Accommodation of service outlets.....	16
5.5.3 Accommodation of service concentration points.....	17
5.6 Interfaces.....	17
5.6.1 Equipment interfaces and test interfaces	17
5.6.2 Channels and links	18
5.7 Dimensioning and configuring	19
5.7.1 General	19
5.7.2 Type A generic cabling	21
5.7.3 Type B generic cabling	22
5.7.4 Service concentration point.....	23
5.7.5 Connecting hardware.....	23
5.7.6 Telecommunications rooms and equipment rooms	23
5.8 Relevant building services	23
6 Channel performance requirements	23
6.1 General.....	23
6.2 Environmental performance	25
6.3 Transmission performance	25
6.3.1 General	25
6.3.2 Balanced cabling	25
6.3.3 Optical fibre cabling.....	26
7 Link performance requirements	26
7.1 General.....	26
7.2 Balanced cabling	27

7.3	Optical fibre cabling	27
8	Reference implementations	27
8.1	General.....	27
8.2	Balanced cabling	27
8.2.1	General	27
8.2.2	Service distribution cabling (Type A generic cabling)	28
8.2.3	Service distribution cabling (Type B generic cabling)	31
8.2.4	Campus and building backbone cabling	31
8.3	Optical fibre cabling	31
8.3.1	Service distribution cabling (Type A generic cabling)	31
8.3.2	Service distribution cabling (Type B generic cabling)	32
8.3.3	Campus and building backbone cabling	32
9	Cable requirements	32
9.1	General.....	32
9.2	Balanced cables	32
9.3	Optical fibre cables	32
10	Connecting hardware requirements	32
10.1	General requirements	32
10.2	Connecting hardware for balanced cabling.....	32
10.2.1	General requirements	32
10.2.2	Electrical, mechanical and environmental performance	32
10.3	Connecting hardware for optical fibre cabling.....	33
11	Cords	33
11.1	Jumpers.....	33
11.2	Balanced cords	33
11.3	Optical fibre cords.....	33
Annex A (informative)	Services and applications	34
A.1	Overview.....	34
A.2	Service sectors and services.....	34
A.2.1	Access control	34
A.2.2	Burglar alarms	35
A.2.3	Asset management	35
A.2.4	Audio-visual.....	35
A.2.5	Building information systems	35
A.2.6	Building well-being and structural sensor systems	35
A.2.7	Energy management.....	35
A.2.8	Environmental control	36
A.2.9	Fixed information technology services	36
A.2.10	Personal well-being	36
A.2.11	Shared information technology services.....	36
A.3	Service concentration point grid density	38
A.4	Cabling provision to service concentration points.....	39
Annex B (informative)	Overlay	40
B.1	General.....	40
B.2	Functional elements.....	40
B.2.1	Type A generic cabling	40
B.2.2	Type B generic cabling	40
B.3	General structure and hierarchy.....	40

B.3.1	Type A generic cabling	40
B.3.2	Type B generic cabling	40
Annex C (informative)	Optical fibre within the Type B service distribution cabling subsystem	41
C.1	Overview.....	41
C.2	Implementation recommendations.....	41
C.2.1	Channel performance	41
C.2.2	Reference implementation	41
C.2.3	Cables	42
C.2.4	Connecting hardware.....	42
C.2.5	Cords	42
Bibliography.....		43

Figure 1 – Relationships between the generic cabling documents produced by ISO/IEC JTC 1/SC 25	7
--	---

Figure 2 – Structure of Type A generic cabling.....	13
---	----

Figure 3 – Hierarchical structure of Type A generic cabling.....	14
--	----

Figure 4 – Structure of Type B generic cabling.....	14
---	----

Figure 5 – Hierarchical structure of Type B generic cabling.....	15
--	----

Figure 6 – Accommodation of functional elements	16
---	----

Figure 7 – Cabling without the use of an SO	17
---	----

Figure 8 – Accommodation of TEs (Type B generic cabling).....	17
---	----

Figure 9 – Test and equipment interfaces (Type A generic cabling)	18
---	----

Figure 10 – Test and equipment interfaces (Type B generic cabling).....	18
---	----

Figure 11 – Example of a Type A generic cabling system with combined BD and SD	20
--	----

Figure 12 – Connection of functional elements providing redundancy for Type A generic cabling	20
---	----

Figure 13 –Transmission performance of a service distribution channel	24
---	----

Figure 14 – Example of a system showing the location of cabling interfaces	25
--	----

Figure 15 – Link options.....	27
-------------------------------	----

Figure 16 – Service distribution cabling models	29
---	----

Figure A.1 – Wireless application coverage area grid.....	38
---	----

Figure C.1 – Combined optical fibre backbone and service distribution channels	42
--	----

Table 1 – Maximum channel lengths for Type A reference implementations	21
--	----

Table 2 – Maximum channel lengths for Type B reference implementations	22
--	----

Table 3 – Service distribution channel length formulae in metres	30
--	----

Table A.1 – Supported wireless applications	37
---	----

Table A.2 – Recommended SCP grid dimensions	39
---	----

Table A.3 – Estimated SOs per SCP	39
---	----
