About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search - webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee,...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 000 terminological entries in English and French, with equivalent terms in 16 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

IEC Glossary - std.iec.ch/glossary

67 000 electrotechnical terminology entries in English and French extracted from the Terms and Definitions clause of IEC publications issued since 2002. Some entries have been collected from earlier publications of IEC TC 37, 77, 86 and CISPR.

CONTENTS

FOREWORD.....	4
INTRODUCTION.....	6
1 Scope.....	8
2 Normative references	8
3 Terms, definitions and abbreviated terms	8
3.1 Terms and definitions.....	8
3.2 Abbreviated terms.....	13
4 Conformance.....	13
5 Architecture.....	13
5.1 Generic protocol description	13
5.1.1 Overview	13
5.1.2 Physical layer	14
5.1.3 Data link layer	14
5.1.4 Network layer	14
5.1.5 Transport layer	15
5.1.6 Session layer.....	15
5.1.7 Presentation layer	15
5.1.8 Application layer.....	15
5.2 Data unit description	15
6 Layer 1 – Physical layer.....	16
6.1 Overview.....	16
6.2 General description.....	16
6.3 Requirements for the 315 MHz AMWSP protocol	18
6.4 Requirements for the 868,3 MHz AMWSP protocol.....	21
6.5 Frame structure	23
7 Layer 2 – Data link layer.....	25
7.1 Overview.....	25
7.2 Subtelegram timing	25
7.3 Data integrity	26
7.3.1 General	26
7.3.2 4 bit summation hash function algorithm	27
7.3.3 8 bit summation hash function algorithm	27
7.3.4 8 bit cyclic redundancy check (CRC) hash function algorithm	27
7.4 Listen before talk	28
8 Layer 3 – Network layer.....	28
8.1 Overview.....	28
8.2 Switch telegram	28
8.3 Repeater.....	29
8.3.1 General	29
8.3.2 Time response for collision avoidance	29
8.3.3 Bits of a repeater level in the STATUS byte	30
8.4 Addressing.....	30
8.4.1 General	30
8.4.2 Encapsulation.....	31
Annex A (informative) Examples of how to evaluate the hash values	32
Bibliography.....	34

Figure 1 – Structure of a subtelegram	15
Figure 2 – Illustration of an ASK envelope and various physical parameters	17
Figure 3 – Complete frame structure for the 868,3 MHz AMWSP protocol	23
Figure 4 – Encoded subframe	24
Figure 5 – TX maturity time divided into four 10 ms time ranges	25
Figure 6 – Conversion of a switch telegram to a normal telegram.....	29
Figure 7 – Example of an encapsulation	31
Figure A.1 – Example of a C code program of the 4 bit long summation hash value	32
Figure A.2 – Example of a C code program of the 8 bit long summation hash value	32
Figure A.3 – Efficient C code program for the evaluation of an 8 bit long CRC type hash value	33
Table 1 – AMWSP protocol stack structure (OSI)	14
Table 2 – Transmitter requirements for the 315 MHz AMWSP protocol	19
Table 3 – Receiver requirements for the 315 MHz AMWSP protocol	20
Table 4 – Minimum required link budget for the 315 MHz AMWSP protocol.....	20
Table 5 – Maximum RX power for the 315 MHz AMWSP protocol	21
Table 6 – Transmitter requirements for the 868,3 MHz AMWSP protocol.....	21
Table 7 – Receiver requirements for the 868,3 MHz AMWSP protocol	22
Table 8 – Minimum required link budget for the 868,3 MHz AMWSP protocol.....	22
Table 9 – Maximum RX power for the 868,3 MHz AMWSP protocol	23
Table 10 – Frame definition for the 315 MHz AMWSP protocol	24
Table 11 – Frame definition for the 868,3 MHz AMWSP protocol	24
Table 12 – Maturity time parameters	25
Table 13 – Allocation of time slots to the different subtelegrams	26
Table 14 – Identification of the hash function used in the telegram	27
Table 15 – Conversion of the telegram type and STATUS fields from a switch telegram to a telegram	29
Table 16 – STATUS byte with repeater level bits	30
Table 17 – Repeating bits in STATUS byte	30

INFORMATION TECHNOLOGY – HOME ELECTRONIC SYSTEM (HES) ARCHITECTURE –

Part 3-10: Amplitude modulated wireless short-packet (AMWSP) protocol optimized for energy harvesting – Architecture and lower layer protocols

FOREWORD

- 1) ISO (International Organization for Standardization) and IEC (International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards. Their preparation is entrusted to technical committees; any ISO and IEC member body interested in the subject dealt with may participate in this preparatory work. International governmental and non-governmental organizations liaising with ISO and IEC also participate in this preparation.
- 2) In the field of information technology, ISO and IEC have established a joint technical committee, ISO/IEC JTC 1. Draft International Standards adopted by the joint technical committee are circulated to national bodies for voting. Publication as an International Standard requires approval by at least 75 % of the national bodies casting a vote.
- 3) The formal decisions or agreements of IEC and ISO on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC and ISO member bodies.
- 4) IEC, ISO and ISO/IEC publications have the form of recommendations for international use and are accepted by IEC and ISO member bodies in that sense. While all reasonable efforts are made to ensure that the technical content of IEC, ISO and ISO/IEC publications is accurate, IEC or ISO cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 5) In order to promote international uniformity, IEC and ISO member bodies undertake to apply IEC, ISO and ISO/IEC publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any ISO/IEC publication and the corresponding national or regional publication should be clearly indicated in the latter.
- 6) ISO and IEC provide no marking procedure to indicate their approval and cannot be rendered responsible for any equipment declared to be in conformity with an ISO/IEC publication.
- 7) All users should ensure that they have the latest edition of this publication.
- 8) No liability shall attach to IEC or ISO or its directors, employees, servants or agents including individual experts and members of their technical committees and IEC or ISO member bodies for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication of, use of, or reliance upon, this ISO/IEC publication or any other IEC, ISO or ISO/IEC publications.
- 9) Attention is drawn to the normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 10) Attention is drawn to the possibility that some of the elements of this International Standard may be the subject of patent rights. ISO and IEC shall not be held responsible for identifying any or all such patent rights.

International Standard ISO/IEC 14543-3-10 was prepared by subcommittee 25: Interconnection of information technology equipment, of ISO/IEC joint technical committee 1: Information technology.

The list of all currently available parts of the ISO/IEC 14543 series, under the general title *Information technology – Home electronic system (HES) architecture*, can be found on the IEC and ISO websites.

This second edition cancels and replaces the first edition published in 2012. This edition constitutes a technical revision.

The text of this standard is based on the following documents:

CDV	Report on voting
JTC1-SC25/2842/CDV	JTC1-SC25/2864/RVC

Full information on the voting for the approval of this standard can be found in the report on voting indicated in the above table.
