About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search -

webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch

Discover our powerful search engine and read freely all the publications previews, graphical symbols and the glossary. With a subscription you will always have access to up to date content tailored to your needs.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 500 terminological entries in English and French, with equivalent terms in 25 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

CONTENTS

FOREWORD.....	3
INTRODUCTION.....	5
0.1 Overview	5
0.2 Relation to existing work	5
0.3 Lexicon and event encoding	6
1 Scope.....	8
2 Normative references	8
3 Terms, definitions and abbreviated terms	8
3.1 Terms and definitions	8
3.2 Abbreviated terms	10
4 Conformance requirements	10
5 HES common language message exchange (HES-CLME).....	11
5.1 HES gateway system	11
5.2 HES – common language internal protocol (HES-CLIP).....	12
5.2.1 HES-CLIP summary	12
5.2.2 Requirements for the IP network	13
5.2.3 Discovery requirements for all devices.....	14
5.2.4 Requirements for lower layer communications for all devices	14
5.2.5 Packet structure.....	15
5.2.6 Operations and communication methods	17
5.2.7 Overall CoAP model.....	17
5.2.8 Client requirements.....	19
5.2.9 Server requirements.....	23
5.3 HES – common language direct PDU exchange (HES-CLDPE).....	28
5.3.1 Overview	28
5.3.2 HES – common language direct PDU exchange (HES-CLDPE/G).....	28
Annex A (normative) Packet construction	31
A.1 Packet construction overview	31
A.2 Packet type: Lexicon representation ('lx').....	32
A.2.1 General	32
A.2.2 Lexicon type: Lexicon representation ('ob').....	33
A.2.3 Lexicon type: Actions ('ac').....	34
A.3 Packet type: Other types of packet	34
Annex B (informative) Example of packet exchange.....	35
B.1 Example setup	35
B.2 Example operation	36
B.3 Time flow diagram and PDU construction for example	37
Bibliography	39
Figure 1 – ISO/IEC 18012-4 within the core interoperability and HES gateway standards	7
Figure 2 – Communications for the HES gateway system.....	12
Figure 3 – Communications paths for HES-CLIP.....	13
Figure 4 – Request and response model for HES-CLIP.....	18
Figure 5 – Publish and subscribe process for HES-CLIP.....	19

Figure 6 – Update interactiveData (incoming)	26
Figure A.1 – Diagram of optional blocks within packet	31
Figure A.2 – Addressing lists.....	32
Figure A.3 – User object packet	33
Figure B.1 – Switch and light example.....	35
Figure B.2 – Binding map storage	36

Information technology – Home electronic system (HES) – Guidelines for product interoperability – Part 4: Event encoding

FOREWORD

- 1) ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work.
- 2) The formal decisions or agreements of IEC and ISO on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC and ISO National bodies.
- 3) IEC and ISO documents have the form of recommendations for international use and are accepted by IEC and ISO National bodies in that sense. While all reasonable efforts are made to ensure that the technical content of IEC and ISO documents is accurate, IEC and ISO cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC and ISO National bodies undertake to apply IEC and ISO documents transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC and ISO document and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC and ISO do not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC and ISO marks of conformity. IEC and ISO are not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this document.
- 7) No liability shall attach to IEC and ISO or their directors, employees, servants or agents including individual experts and members of its technical committees and IEC and ISO National bodies for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this ISO/IEC document or any other IEC and ISO documents.
- 8) Attention is drawn to the Normative references cited in this document. Use of the referenced publications is indispensable for the correct application of this document.
- 9) IEC and ISO draw attention to the possibility that the implementation of this document may involve the use of (a) patent(s). IEC and ISO take no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, IEC and ISO had not received notice of (a) patent(s), which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at <https://patents.iec.ch> and www.iso.org/patents. IEC and ISO shall not be held responsible for identifying any or all such patent rights.

ISO/IEC 18012-4 has been prepared by subcommittee 25: Interconnection of information technology equipment, of ISO/IEC joint technical committee 1: Information technology. It is an International Standard.

The text of this International Standard is based on the following documents:

Draft	Report on voting
JTC1-SC25/3270/CDV	JTC1-SC25/3312/RVC

Full information on the voting for its approval can be found in the report on voting indicated in the above table.

The language used for the development of this International Standard is English.

This document was drafted in accordance with ISO/IEC Directives, Part 2, and developed in accordance with ISO/IEC Directives, Part 1, and the ISO/IEC Directives, JTC 1 Supplement available at www.iec.ch/members_experts/refdocs and www.iso.org/directives.

A list of all parts in the ISO/IEC 18012 series, published under the general title *Information technology – Home Electronic System (HES) – Guidelines for product interoperability*, can be found on the IEC and ISO websites.

The use of formatting with ***bold italics*** is used throughout this document for data formats as specified in ISO/IEC 18012-3.
