ε -neighbourhood	442	celestiocentric SRFT	222
2D spatial reference frame	211	celestiodetic SRFT	224
3D spatial reference frame	211	celestiomagnetic OBRS	204
A		celestiomagnetic SRFT	234
abstract coordinate system	37	central scale	59
abstract object	34	change of basis	121
accuracy domain	437	Clairaut constant	298
affine	443	class	301
angle between two curves	446	class instance	301
applicable object reference model to a spatial reference frame template	221	closed curve	446
applicable region	211	closed set	442
description	212	closure of a set	442
specification	212	closure point	442
approximation error	460	common error conditions	309
arc length	448	compatible normal embedding	180
arctan2 function	448	component function	442
Aries true of date	196	composition of functions	443
augmented equidistant cylindrical CS	93	computational accuracy requirement	438
augmented Lambert conformal conic CS	89	computational error	460
augmented map projection	60	conformal map projection	53
augmented Mercator CS	80	conformance	437
augmented oblique Mercator spherical CS	82	of a functional implementation	438
augmented polar stereographic CS	91	of a language binding	439
augmented transverse Mercator CS	85	of an application	439
azimuth of C at p	446	of an exchange format	439
azimuthal CS	106	conic classification	58
azimuthal cylindrical CS	113	conic projection function	452
azimuthal spherical CS	70	connected	447
B		continued normal vector	447
backward azimuth	296	convergence of the meridian	55
basic data type	301	coordinate	31
binding constraint	182	coordinate of a position	38
bound reference datum	160	coordinate system domain	37
C		coordinate system localization	45
canonical basis	441	coordinate system parameters	38
		coordinate system range	37

coordinate system type	38
coordinate-component	31
coordinate-component curve	42
coordinate-component surface	41
coordinated universal time	119
coordinate-region	212
coordinate-space	31
correction	638
cross product	442
curve generating function.....	447
curvilinear coordinate system	43
curvilinear spatial reference frame.....	211
cylindrical classification.....	57
cylindrical CS	77
cylindrical projection function.....	451

D

deprecation	638
designated spatial surface	271
digitization error	460
dimension of an object reference model.....	210
directed curve	445
direction.....	33
direction at c	218
direction cosine matrix	124
directional point distortion	53
display coordinate	54
distance-preserving function.....	35
dot-product.....	441
DSS model.....	271
dynamic temporal coordinate system	118

E

Earth gravitational model	5
Earth reference model	182
easting.....	51
eccentricity	444
ecliptic longitude of the Sun	199
ecliptic plane	5

elevation	273
ellipse, implicitly defined	448
ellipse, parametrically specified	445
ellipsoid of revolution	444
embedded frame	35
enumerated data type	303
epoch	118
equator	43
equatorial inertial OBRS	196
equatorial inertial SRFT	235
equatorial plane.....	5
equatorial spherical CS.....	67
equidistant cylindrical CS	93
equidistant cylindrical SRFT	244
equinox.....	196
equipotential surface	271
error criteria for operations on SRFs.....	438
Euclidean 1D CS.....	112
Euclidean 2D CS.....	103
Euclidean 3D CS.....	64
Euclidean distance.....	295 , 441
Euclidean metric.....	441
extended region	211
extended region specification	212

F

false easting	59
false northing.....	59
first derivative	443
first point of Aries	196
flattening.....	444
forward azimuth.....	296

G

general rotate-scale-translate 2D STT	173
general rotate-scale-translate 3D STT	172
generalized Helmert STT (CFR)	176
generalized Helmert STT (PVR)	175
generating function	37
