| <b>Foreword</b>                                                                      | <b>v</b>  |
| <b>Introduction</b>                                                                  | <b>vi</b> |
| <b>1 Scope</b>                                                                       | <b>1</b>  |
| <b>2 Normative references</b>                                                        | <b>1</b>  |
| <b>3 Terms and definitions</b>                                                       | <b>1</b>  |
| 3.1 General biometric terms                                                          | 1         |
| 3.2 Biometric systems                                                                | 3         |
| 3.3 Biometric processes                                                              | 4         |
| 3.4 Recognition performance                                                          | 5         |
| 3.5 Presentation attack detection                                                    | 6         |
| <b>4 Abbreviated terms</b>                                                           | <b>7</b>  |
| <b>5 Overview of security evaluation of biometric systems</b>                        | <b>7</b>  |
| 5.1 Biometric systems and their vulnerabilities                                      | 7         |
| 5.2 Approach of security evaluation of biometric systems                             | 8         |
| <b>6 Threat and vulnerability analysis</b>                                           | <b>9</b>  |
| 6.1 Overview                                                                         | 9         |
| 6.2 Threats and vulnerabilities for considerations                                   | 10        |
| 6.2.1 Overview                                                                       | 10        |
| 6.2.2 Performance limitations                                                        | 11        |
| 6.2.3 Hostile environment                                                            | 12        |
| 6.2.4 Insufficient controls of the enrolment process                                 | 12        |
| 6.2.5 Difficulty of concealing biometric characteristics                             | 13        |
| 6.2.6 Leakage and alteration of biometric data                                       | 13        |
| 6.2.7 Synthesized wolf biometric samples                                             | 13        |
| 6.2.8 PAI of biometric characteristics                                               | 14        |
| 6.2.9 Similarity due to blood relationship                                           | 14        |
| 6.2.10 Special biometric characteristics                                             | 14        |
| 6.2.11 Modification of biometric characteristics                                     | 15        |
| 6.2.12 Further considerations                                                        | 15        |
| <b>7 Evaluation of biometric recognition performance and related vulnerabilities</b> | <b>15</b> |
| 7.1 Overview                                                                         | 15        |
| 7.2 Concept – testing security-relevant error rates                                  | 15        |
| 7.3 Independent testing                                                              | 16        |
| 7.4 Consideration of impact of error rates                                           | 17        |
| <b>8 Evaluation of biometric vulnerabilities</b>                                     | <b>17</b> |
| 8.1 Overview                                                                         | 17        |
| 8.2 Vulnerability assessment for presentation attacks and other potential threats    | 18        |
| 8.2.1 Application note                                                               | 18        |
| 8.2.2 Performance limitations                                                        | 18        |
| 8.2.3 Hostile environment                                                            | 18        |
| 8.2.4 Procedural vulnerabilities around the enrolment process                        | 19        |
| 8.2.5 Difficulty of concealing biometric characteristics                             | 19        |
| 8.2.6 Leakage and alteration of biometric data                                       | 19        |
| 8.2.7 Synthesized wolf biometric samples                                             | 20        |
| 8.2.8 PAI of biometric characteristics                                               | 20        |
| 8.2.9 Similarity due to blood relationship                                           | 21        |
| 8.2.10 Special biometric characteristics                                             | 22        |
| 8.2.11 Modification of biometric characteristics                                     | 22        |
| 8.2.12 Further considerations                                                        | 22        |
| <b>9 Privacy</b>                                                                     | <b>23</b> |
| 9.1 Overview                                                                         | 23        |

## Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see [www.iso.org/directives](http://www.iso.org/directives) or [www.iec.ch/members\\_experts/refdocs](http://www.iec.ch/members_experts/refdocs)).

ISO and IEC draw attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO and IEC take no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO and IEC had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at [www.iso.org/patents](http://www.iso.org/patents) and <https://patents.iec.ch>. ISO and IEC shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see [www.iso.org/iso/foreword.html](http://www.iso.org/iso/foreword.html). In the IEC, see [www.iec.ch/understanding-standards](http://www.iec.ch/understanding-standards).

This document was prepared by Joint Technical Committee ISO/IEC JTC 1, *Information technology*, Subcommittee SC 27, *Information security, cybersecurity and privacy protection*.

This second edition cancels and replaces the first edition (ISO/IEC 19792:2009), which has been technically revised.

The main changes are as follows:

- the structure has been harmonized with general security evaluation methodology;
- the title has been changed from “Security evaluation of biometrics” to “General principles, requirements and guidance for security evaluation of biometric systems”, to align with the ISO/IEC 19989 series, the ISO/IEC 15408 series and the ISO/IEC 18045.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at [www.iso.org/members.html](http://www.iso.org/members.html) and [www.iec.ch/national-committees](http://www.iec.ch/national-committees).
