|------------------------------------------------------------|------------|
| <b>Foreword</b>                                            | <b>vi</b>  |
| <b>Introduction</b>                                        | <b>vii</b> |
| <b>1 Scope</b>                                             | <b>1</b>   |
| <b>2 Normative references</b>                              | <b>1</b>   |
| <b>3 Terms, definitions, abbreviated terms and symbols</b> | <b>2</b>   |
| 3.1 Terms and definitions                                  | 2          |
| 3.2 Abbreviated terms                                      | 6          |
| 3.3 Mathematical functions                                 | 7          |
| <b>4 Overview</b>                                          | <b>7</b>   |
| <b>5 General requirements</b>                              | <b>7</b>   |
| 5.1 General requirements on files                          | 7          |
| 5.2 General requirements on readers                        | 7          |
| 5.3 Multi-purpose files                                    | 8          |
| 5.4 Other boxes                                            | 8          |
| <b>6 Single image and image collection</b>                 | <b>8</b>   |
| 6.1 General                                                | 8          |
| 6.2 Derivation from the ISO base media file format         | 8          |
| 6.3 Derivation of an output image of an image item         | 8          |
| 6.4 Roles of images                                        | 9          |
| 6.4.1 General                                              | 9          |
| 6.4.2 Hidden images                                        | 9          |
| 6.4.3 Cover image                                          | 9          |
| 6.4.4 Thumbnail images                                     | 9          |
| 6.4.5 Auxiliary images                                     | 10         |
| 6.4.6 Master images                                        | 10         |
| 6.4.7 Pre-derived coded images                             | 10         |
| 6.4.8 Multi-layer images                                   | 10         |
| 6.4.9 Predictively coded image items                       | 11         |
| 6.5 Image properties                                       | 11         |
| 6.5.1 General                                              | 11         |
| 6.5.2 Decoder configuration and initialization             | 12         |
| 6.5.3 Image spatial extents                                | 12         |
| 6.5.4 Pixel aspect ratio                                   | 13         |
| 6.5.5 Colour information                                   | 13         |
| 6.5.6 Pixel information                                    | 14         |
| 6.5.7 Relative location                                    | 15         |
| 6.5.8 Image properties for auxiliary images                | 15         |
| 6.5.9 Clean aperture                                       | 16         |
| 6.5.10 Image rotation                                      | 16         |
| 6.5.11 Layer selection                                     | 17         |
| 6.5.12 Image mirroring                                     | 18         |
| 6.5.13 Image scaling                                       | 18         |
| 6.5.14 Content light level                                 | 19         |
| 6.5.15 Mastering display colour volume                     | 20         |
| 6.5.16 Content colour volume                               | 20         |
| 6.5.17 Required reference types                            | 21         |
| 6.5.18 Creation time information                           | 21         |
| 6.5.19 Modification time information                       | 22         |
| 6.5.20 User description                                    | 22         |
| 6.5.21 Accessibility text                                  | 23         |
| 6.5.22 Auto exposure information                           | 24         |
| 6.5.23 White balance information                           | 24         |
| 6.5.24 Focus information                                   | 25         |

|          |                                                               |           |
|----------|---------------------------------------------------------------|-----------|
| 6.5.25   | Flash exposure information.....                               | 26        |
| 6.5.26   | Depth of field information .....                              | 26        |
| 6.5.27   | Panorama information.....                                     | 27        |
| 6.5.28   | Sub-sample information .....                                  | 28        |
| 6.5.29   | Target output layer set.....                                  | 28        |
| 6.5.30   | Wipe transition effect.....                                   | 29        |
| 6.5.31   | Zoom transition effect.....                                   | 30        |
| 6.5.32   | Fade transition effect.....                                   | 31        |
| 6.5.33   | Split transition effect.....                                  | 32        |
| 6.5.34   | Suggested transition period.....                              | 33        |
| 6.5.35   | Suggested time display duration .....                         | 33        |
| 6.5.36   | Ambient viewing environment.....                              | 34        |
| 6.5.37   | Progressive derived image item information.....               | 35        |
| 6.5.38   | Single stream.....                                            | 37        |
| 6.5.39   | Camera extrinsic matrix.....                                  | 38        |
| 6.5.40   | Camera intrinsic matrix.....                                  | 41        |
| 6.6      | Derived images and derived image items.....                   | 42        |
| 6.6.1    | General.....                                                  | 42        |
| 6.6.2    | Derived image types and derived image item types.....         | 43        |
| 6.7      | Image metadata.....                                           | 45        |
| 6.8      | Entity and sample groups.....                                 | 45        |
| 6.8.1    | Relating an untimed item to a timed sequence.....             | 45        |
| 6.8.2    | Burst images .....                                            | 46        |
| 6.8.3    | 'tsyn' entity group .....                                     | 47        |
| 6.8.4    | 'iaug' entity group .....                                     | 47        |
| 6.8.5    | 'ster' entity group.....                                      | 48        |
| 6.8.6    | Bracketed sets/logically group of images at capture-time..... | 48        |
| 6.8.7    | User-defined image collections.....                           | 51        |
| 6.8.8    | Panorama.....                                                 | 52        |
| 6.8.9    | Slideshow entity group.....                                   | 53        |
| 6.8.10   | Progressive rendering entity group.....                       | 53        |
| 6.9      | Auxiliary image item types and sample formats.....            | 54        |
| 6.9.1    | CICP-compliant alpha plane.....                               | 54        |
| 6.9.2    | CICP-compliant depth map.....                                 | 55        |
| 6.10     | Text and font items.....                                      | 55        |
| 6.10.1   | Text item.....                                                | 55        |
| 6.10.2   | Text properties.....                                          | 56        |
| 6.10.3   | Font item.....                                                | 58        |
| 6.10.4   | Font properties.....                                          | 59        |
| <b>7</b> | <b>Image sequences.....</b>                                   | <b>60</b> |
| 7.1      | General.....                                                  | 60        |
| 7.2      | Derivation from the ISO base media file format.....           | 60        |
| 7.2.1    | Track Header box .....                                        | 60        |
| 7.2.2    | Handler type .....                                            | 60        |
| 7.2.3    | Coding Constraints box.....                                   | 61        |
| 7.3      | Presentation of an image sequence track.....                  | 61        |
| 7.4      | Sample groups.....                                            | 62        |
| 7.4.1    | Direct reference samples list.....                            | 62        |
| 7.5      | Other tracks .....                                            | 63        |
| 7.5.1    | General.....                                                  | 63        |
| 7.5.2    | Thumbnail image sequence track.....                           | 63        |
| 7.5.3    | Auxiliary image sequence track.....                           | 64        |
| <b>8</b> | <b>Metadata support.....</b>                                  | <b>64</b> |

| 10.2                         | Image and image collection brands.....                                         | 67         |
| 10.2.1                       | General requirements on brands.....                                            | 67         |
| 10.2.2                       | 'mif1' structural brand.....                                                   | 68         |
| 10.2.3                       | 'mif2' structural brand.....                                                   | 69         |
| 10.2.4                       | 'pred' brand.....                                                              | 70         |
| 10.2.5                       | '1pic' brand.....                                                              | 71         |
| 10.3                         | Image sequence brands.....                                                     | 71         |
| 10.3.1                       | 'msf1' structural brand.....                                                   | 71         |
| <b>11</b>                    | <b>Region and region annotation.....</b>                                       | <b>72</b>  |
| 11.1                         | Overview.....                                                                  | 72         |
| 11.2                         | Common definitions for image sequence or video tracks and for image items..... | 72         |
| 11.2.1                       | Region geometry structure.....                                                 | 72         |
| 11.2.2                       | Mask item.....                                                                 | 76         |
| 11.3                         | Regions and region annotations for an image item.....                          | 77         |
| 11.3.1                       | General.....                                                                   | 77         |
| 11.3.2                       | Region item.....                                                               | 78         |
| 11.3.3                       | Derived region item.....                                                       | 79         |
| 11.4                         | Regions and region annotations for an image sequence or a video track.....     | 79         |
| 11.4.1                       | General.....                                                                   | 79         |
| 11.4.2                       | Region track.....                                                              | 80         |
| 11.4.3                       | Sample groups for region track.....                                            | 82         |
| <b>Annex A (normative)</b>   | <b>Storage of externally specified metadata.....</b>                           | <b>85</b>  |
| <b>Annex B (normative)</b>   | <b>HEVC Image File Format.....</b>                                             | <b>87</b>  |
| <b>Annex C (normative)</b>   | <b>High efficiency image file MIME type registration.....</b>                  | <b>98</b>  |
| <b>Annex D (normative)</b>   | <b>High efficiency image sequence file MIME type registration.....</b>         | <b>101</b> |
| <b>Annex E (normative)</b>   | <b>AVC in the Image File Format.....</b>                                       | <b>103</b> |
| <b>Annex F (normative)</b>   | <b>Advanced coding image MIME type registration.....</b>                       | <b>107</b> |
| <b>Annex G (normative)</b>   | <b>Advanced coding sequence MIME type registration.....</b>                    | <b>109</b> |
| <b>Annex H (normative)</b>   | <b>JPEG in the Image File Format.....</b>                                      | <b>111</b> |
| <b>Annex I (informative)</b> | <b>Guidelines for specifying storage of image coding formats.....</b>          | <b>115</b> |
| <b>Annex J (informative)</b> | <b>Examples of image collections.....</b>                                      | <b>116</b> |
| <b>Annex K (informative)</b> | <b>Examples of progressive decoding, rendering and refinement.....</b>         | <b>120</b> |
| <b>Annex L (normative)</b>   | <b>VVC Image File Format.....</b>                                              | <b>128</b> |
| <b>Annex M (normative)</b>   | <b>EVC Image File Format.....</b>                                              | <b>138</b> |
| <b>Annex N (informative)</b> | <b>Privacy and security considerations.....</b>                                | <b>143</b> |
| <b>Bibliography</b>          | <b>.....</b>                                                                   | <b>145</b> |

## Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see [www.iso.org/directives](http://www.iso.org/directives) or [www.iec.ch/members\\_experts/refdocs](http://www.iec.ch/members_experts/refdocs)).

ISO and IEC draw attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO and IEC take no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO and IEC had received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at [www.iso.org/patents](http://www.iso.org/patents) and <https://patents.iec.ch>. ISO and IEC shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see [www.iso.org/iso/foreword.html](http://www.iso.org/iso/foreword.html). In the IEC, see [www.iec.ch/understanding-standards](http://www.iec.ch/understanding-standards).

This document was prepared by Joint Technical Committee ISO/IEC JTC 1, *Information technology*, SC 29, *Coding of audio, picture, multimedia and hypermedia information*.

This third edition cancels and replaces the second edition (ISO/IEC 23008-12:2022), which has been technically revised.

The main changes are as follows:

- clarification on the signalling of colour information in image items;
- support for the signalling of camera intrinsic and extrinsic matrices;
- support for progressive decoding, rendering and refinement;
- support for region annotations for image sequence or video track;
- support for renderable text items.

A list of all parts in the ISO/IEC 23008 series can be found on the ISO and IEC websites.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at [www.iso.org/members.html](http://www.iso.org/members.html) and [www.iec.ch/national-committees](http://www.iec.ch/national-committees).

## Introduction

The Image File Format is designed to enable the interchange of images and image sequences, as well as their associated metadata. It forms part of a family of specifications that are box-structured, and is built using tools defined in the ISO base media file format. This document specifies both structural brands that can be used with any codec and brands specific to High Efficiency Video Coding (HEVC). The file format specified in this document is referred to as the High Efficiency Image File Format (HEIF). It is suggested that HEIF be pronounced "heaff" (like heath with an ff ending). When the requirements of the HEVC-specific brands are applied, the file format can be referred to as the HEVC Image File Format.

This document is organized as follows:

[Clause 5](#) specifies general requirements on files and file readers conforming to the Image File Format.

[Clause 6](#) specifies the file structures for the storage of a single image and an image collection. Additionally, general requirements that shall be supported in all files using the Image File Format for the storage of a single image or an image collection are specified.

[Clause 7](#) specifies the file structures for the storage of image sequences. Additionally, general requirements that shall be supported in all files using the Image File Format for the storage of image sequences are specified.

[Clause 8](#) specifies the metadata structures for a single image, an image collection, and image sequences.

[Clause 9](#) specifies enhancements to the ISO base media file format.

[Clause 10](#) specifies structural brands for a single image and an image collection, as well as image sequences. Requirements on both files and file readers are specified.

[Clause 11](#) specifies tools to associate annotations, e.g. metadata or images with one or more regions of an image or an image sequence.

[Annex A](#) specifies the format for storing Exif, XMP, and MPEG-7 metadata in files conforming to the Image File Format.

[Annex B](#) specifies the format for encapsulating HEVC-coded images, image collections, and image sequences according to the Image File Format. [Annex B](#) also specifies HEVC-specific brands for a single image and an image collection as well as image sequences. Requirements on both files and file readers are specified.

[Annex C](#) and [Annex D](#) specify the MIME type registration for a single image or an image collection, and image sequences, respectively, for the structural and HEVC-specific brands.

[Annex E](#) specifies the format for encapsulating AVC-coded images, image collections, and image sequences according to the Image File Format.

[Annex F](#) and [Annex G](#) specify the MIME type registration for a single image or an image collection, and image sequences, respectively, for the AVC-specific brands.

[Annex H](#) specifies the format for encapsulating JPEG-coded images, image collections, and image sequences according to the Image File Format.

[Annex I](#) contains guidelines on defining new image formats and brands.

[Annex J](#) contains informative examples of single image and image collection file structures conforming to the Image File Format.

[Annex K](#) provides examples of content encoding, file structures and player operations for progressive rendering, progressive decoding and progressive refinement with the Image File Format.

[Annex L](#) specifies the format for encapsulating VVC-coded images, image collections, and image sequences according to the Image File Format. [Annex L](#) also specifies VVC-specific brands for a single image and an image collection as well as image sequences. Requirements on both files and file readers are specified.
