Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: www.iso.org/iso/foreword.html.

This document was prepared by Joint Technical Committee ISO/IEC JTC 1, *Information technology*, Subcommittee SC 7, *Software and systems engineering*.

This second edition cancels and replaces the first edition (ISO/IEC 29155-1:2011), of which it constitutes a minor revision. The changes compared to the previous edition are as follows:

ISO/IEC 29155-1:2017
https://standards.iteh.ai/catalog/standards/iso/4755fdf2-bd9e-466e-85c5-e360320b11d6/iso-iec-29155-1-2017

— the introduction was restructured and updated to add descriptions for ISO/IEC 29155-2, -3, and -4, which were published after the publication of the first edition;

— Clause 2 (Normative references) was added following the new requirements of ISO/IEC Directives, Part 2 (Seventh edition);

— definitions were added to include major terms and definitions of other parts of ISO/IEC 29155;

— abbreviations of names of benchmarking activities were added;

— minor editorial improvements were made to increase understandability and readability throughout the document; and

— Clause 5 of the first edition was restructured to Clauses 5 to 9.
